GURUKKAL KAVU

JUNE 2016

PREFACE

Institution of Foresters Kerala (IFK) is a society registered in the year 1987 under the Travancore Literary, Science and Charitable Societies Act 1955 with its Central office at Thiruvananthapuram. Later it has established two Regional Chapters one at Thrissur and another at Kozhikode. One of the objectives of IFK is to undertake studies on topics useful in Forest Management. Accordingly a Project-“A comprehensive study on the socio-economic and cultural aspects of sacred groves in Kerala” was prepared and submitted to Kerala Forest Department in June 2012. This project was examined and discussed by the Kerala Forest Development Fund Research Committee in its meeting held on 18th August 2012 and was approved for implementation. The project envisages a detailed study of Sacred Groves (SGs) in all the 14 districts of Kerala one by one.

To start with Thiruvananthapuram District was allotted and IFK completed the study and submitted the report in November 2013. Subsequently Kollam district was taken up for similar study and it was completed and report submitted in 2015. In the meeting of the KFDF Research Committee which met on 17-04-2013 Kozhikode District was allotted for the study and the MOU was executed on 9th June 2013. The quantum of work involved was very huge and five teams had to work to complete the data collection. On completing the field work in 2015 the number of sacred groves was found to be 1231 against the earlier expected number as around 100.

Five field teams each headed by retired Section Forest Officers carried out the data collection by inspecting each sacred grove. Their activity was supervised by a Dy. Conservator of Forests (Rtd.) and an Assistant Conservators of Forests (Rtd). The data collection was checked in the field at random by senior members of IFK Executive Committee on different occasions. The field team had a laborious task before them to reach the SGs in remote areas and to visit the same SGs on different times to complete the data collection. Dr. N. Sasidharan, Expert on Botany (Ex-KFRI) joined us in detailed identification of flora in selected 28 SGs distributed over all the four taluks.

IFK record its immense gratitude to Kerala Forest Department in entrusting this glorious task with it. We also thank Shri. S.C.Joshi IFS (PCCF-D) and Sri. L.K.Vashney IFS, Addl.PCCF and Chairman KFDF for their guidance and

promptness in removal of impediments in the most appropriate manner to complete the study in the best possible way. Sri. K.G.Mohanlal IFS (PCCF-D) and Sri.Pramod Kumar Pathak,IFS (APCCF-Chaiman DFDF) who subsequently took over also deserve our gratitude for the support rendered to us in completing this voluminous work. Our thanks are due to the members of the KFDF Research Committee for their positive attitude in IFK's activities. Finally we express our thanks in no small measure to other officers and staff at Forest Headquarters, particularly Shri. Santhosh K John IFS (DCF Development) and his assisting team in extending fair approach to IFK to make this activity hassle free.

This study report may serve as the valid document on the status and distribution of Sacred Groves in the district. It is our modest expectation that it forms the basis for future planning on the conservation of this precious eco-system

It will be our pleasure to clarify any of the details included in this report to all those concerned.We also welcome suggestions and our omissions from readers interested.

9 -7 -2016

M.S.Nair (President)
Institution of Foresters Kerala

ACKNOWLEDGEMENT FOR SERVICES RENDERED

This project report is the result of the sincere and hard work contributed by a number of members of IFK and a few others from outside. behalf of IFK, I take immense pleasure in extending deep gratitude to them. The nature of work contributed by them is acknowledged as below:-

Field Enumeration & Data Collection	<p>Sri. P. Rajan, Section Forest Officer (Rtd)</p> <p>Sri. T.V. Rajan, Section Forest Officer (Rtd)</p> <p>Sri. T. Vijayan, Section Forest Officer (Rtd)</p> <p>Sri. P.V. Vijayan, Section Forest Officer (Rtd)</p> <p>Sri. Nanu Nair, Section Forest Officer (Rtd)</p>
Field supervision & Field coordination	<p>Sri. A. Sathyanathan (ACF Rtd)</p> <p>Sri. M. Murali (DCF Rtd)</p>
Flora identification	Dr. N. Sasidharan. (Ex. KFRI Peechi)
Field checking	<p>Sri. M.S.Nair</p> <p>Sri. Patric Gomez</p>
Data entry	M/s. Jaicom Facility Centre
Verification of data entry & Compilation	<p>Sri. M.S.Nair</p> <p>Sri. Patric Gomez</p>
REPORT PREPARATION	
Review of literature	<p>Sri. M.S.Nair</p> <p>Sri. C.K.Karunakaran</p>
Result of Study	Sri. Patric Gomez
List of Plants in selected groves	Dr. N.Sasidharan

Frequency distribution of flora	Dr.N.Sasidharan
Ecological status	Sri.M.S.Nair
Socio-Cultural aspects	Sri. Patric Gomez & Dr. Ajitkumar
All other chapters	Sri. M.S.Nair
Photographs contributed	Sri. M.S.Nair & Dr. N.Sasidharan
Editing & Finalization of the Report	Sri. M.S. Nair (Principal Investigator of the project) Sri. Patric Gomez (Chief Coordinator of the project)

Also, I take this opportunity to sincerely acknowledge the cooperation, and valuable suggestions contributed by the Executive Committee members of IFK from time to time to accomplish this task at the best of our ability.

9 -7-2016

M.S.Nair (President)
Institution of Foresters Kerala

EXECUTIVE SUMMARY

Name of Project: **A COMPREHENSIVE STUDY ON THE
SOCIO-ECONOMIC & CULTURAL ASPECTS OF
SACRED GROVES IN KERALA**

Report No.3 - ***Kozhikode District***

General

Sanctioning Authority - Addl.Principal Chief Conservator (Development) and
Chairman, KFDF Research Committee.
Implementing Agency - Institution of Foresters Kerala
Principal Investigator - M. S. NAIR
Date of Agreement - 09-06-2013
Area of Study - Kozhikode District.
Geographical extent of the District 2,206 sq.km
No. of Taluks - Four

PART I

Chapter . I

INTRODUCTION

Objectives

- Arrive at an exhaustive list of Sacred Groves in the District.
- Detailed study of flora and fauna
- Documentation of geographical and legal details.
- Study on Socio-economic and cultural aspects
- Conduct study on ecological status

Uniqueness

- Exhaustive inventory of Sacred Groves.
- Creation of a databank on geographical and legal status of sacred groves.
- Detailed study on flora.
- Documentation of Socio-economic and Cultural aspects.
- Mapping SGs providing Id numbers.

Methodology

Described steps followed in data collection(through publicity , word of mouth etc.) and documentation.

Chapter II: Review of Literature

Definition, global scenario, attitude of different religions in the world towards sacred groves, Indian scenario, number of SGs, flora and fauna documented earlier etc.

Chapter III : Results of Study

Total number of SGs district wise, Taluk wise, distribution under different size categories.management details.

KOZHIKODE DISTRICT

Sl. No.	Name of Taluk	No. of Sacred Groves	Extent (Cents)
1	Kozhikode	653 Nos.	183.96.Acr.(77.50 ha)
2	Koilandy	373 Nos.	96.15 “ (38.92 ha)
3	Vadakara	126 Nos	41.68 “ (16.87 ha)
4	Thamarassery	79 Nos	26.4 “ (10.68 ha.)
	Total	1231 Nos.	348.19 Ac. (143.97 ha)

Management

Five main categories identified-

- i. Malabar Devaswam Board. 22
- ii. Public trust- 5
- iii. Public Committee,- 176
- iv. Private- (- Kudumbakavu & Kudumba Trust)- 1027

Id Numbers to Sacred Groves.(SG)

Id numbers have been provided taluk wise-

Kozhikode	KKD/Kkd	1 to 653
Koilandy	KKD/Kly	1 to 373
Vadakara	KKD/Vdk	1 to 126
Thamarassery	KKD/ Tms	1 to 79

The list of all the SGs have been given serial numbers coming in each taluk and details from name, ownership up to North and East co-ordinates.

A Statement giving all other information including management category has been attached.

Mapping-

Separate map for each taluk has been prepared showing the location and Id numbers of SGs.

Chapter IV : Composition of Vegetation.

Occurrence of important species have been described and rare species seen in the SGs have been listed out noting conservation status

Trees-, Shrubs- , Climbers-.Herbs-

Chater V: List of flora in Selected Sacred Groves.

In all 28 SGs falling in the three regions low land, middle land and high land- have been inspected and prepared by an expert on Botany and Taxonomy . The important species identified are tabulated SG wise.

Chapter VI: Frequency distribution of flora.

The distribution of plant species in various sacred groves has been analysed and tabulated in 24 categories.

Chapter VII: Ecological Status

<i>Vegetation-</i>	Plant diversity with rare Invasive species, Keystone species, Natural regeneration, nature of occurrence of species region wise,
<i>Soil condition-</i>	Result of soil tests and analysis, soil and water conservation discussed.
<i>Faunal significance-</i>	Useful and harmful role of bats, termites, peafowl etc.as could be collected with their habits.

Chapter VIII : Social Dimensions of Sacred Groves.

Sacred Groves falling in different regions totaling 90 numbers were selected and the social conditions in relation to the Sacred Groves have been studied. Mainly five stake holders have been identified such as, i-Local people, ii. Custodians, iii, Priest hood, iv. Shop keepers and v. younger generation. Representatives belonging to all the above categories have been contacted with suitable questionnaire and analyzed their views.

Study revealed that there is a strong network of social system centered around sacred groves built on faith on God, customs, harmony and flow of income. It is estimated that the following is the minimum effect on socio-economic condition annually.

Communal harmony and social harmony.

Development of strong trend in protection of vegetation due to fear of God/environmental benefits.

Employment-Mandays -2,27,952 - Remuneration- Rs. 603.2 lakhs

Total amount generated through various sources-Rs. 2729 .03lakhs.

Other shop vendors depending on SGs for their livelihood – very few.

Chapter IX : Socio-Cultural Aspects of Sacred Groves

This study has covered the belief entertained by devotees on various deities, the rituals performed during worship, and different cultural programmes being organized in festivals. The role of Astrologers predominant in this region is pointed out. Various prominent folk arts like kolangal, kavoottu, Thirayattam, Theyyam are described with illustrations.

Chapter X : Myths & Legends.

Prepared based on information narrated by custodians and related people.

Chapter XI : Threats and Recommendations

Regarding threats, intention showed by a few to reduce extent by shifting deity, encroachment, disputes on ownership, dumping waste etc. are discussed with examples.

Main recommendations

- i. Awareness programmes including suggestions to prevent dumping solid waste
- ii. Arrangement for fair distribution of grant to deserving custodians,
- iii. Production of quality seedlings of selected species,
- iv. Interference by government to be cautiously done.
- v. Conducting research on ecology and carbon sequestration in Sacred Groves

Pictures on various sites, activities and plants- 35 plates.

PART II

Maps of SGs with Id numbers- taluk wise.

Detailed statements on Management & Geographical details of SGs - talukwise.

Report No.3

Study on

SCRED GOVES IN KOZHIKKODE DISTRICT

CHAPTER I

INTRODUCTION

The existence of sacred groves in India dates back to ancient pre-agrarian hunter gathering era and their presence has been documented since early 1800's. Believing that trees are the abode of deities and ancestral spirits, many communities set aside sanctified areas of forest and established rules and customs to ensure their protection prohibiting felling trees, killing animals etc. The prevailing belief among devotees is that the presiding deities administer punishment to individuals or entire community in the form of diseases or crop failure if in case they violate the established customs. As a result of such restrictions and strict adherence to the accepted customs by the devotees , several endemic and endangered plant and animal species have survived in the sacred groves for so many years since. Sacred groves attain religious and holy significance all over.

The Earth Summit of 1992 emphasized the immediate need for protection and conservation of biodiversity. Following that, the approach to biodiversity conservation gained revamping image all over the world. Protection with veneration provided to these patches of forest as Sacred Groves from generations to generations all over the world is significant in the sense that the principles of bio-diversity conservation had been inbuilt in their management. In India the Biological Diversity Act enacted in 2002, stressed the need for implementing various measures for bio-diversity conservation.. In the mean while, the Kerala Forestry Project (1998-2003) stressed the need for biodiversity conservation and constituted a Biodiversity Cell in Forest Department. The Kerala Forestry Project (1998) proposed the need for long term conservation of sacred groves by taking up ecological survey and inventory of sacred groves. In addition the project provided for lump sum allocation of grants to local communities and religious groups to improve awareness, demarcation, protection and enhancement of local practices in Sacred Groves. But even after 17 years on completion of the project implementation a clear picture as to the spread of area under vegetation and the related inventory about the sacred groves was lacking. However the present trend of Kerala Forest Department (KFD) in complying with the objectives by imbibing the theme is worthy for appreciation.

Protection and Conservation of Sacred Groves is one among the schemes and KFD is providing grant to various selected sacred groves under this scheme. For implementing such a scheme a database covering inventory with all relevant details is very essential in order to obtain financial assistance in the full measure from Central Government . Though studies have been undertaken and reports published on sacred groves of Kerala by various individuals and organizations, such reports do not cover all the relevant details and they cover only part of some aspects, that too in incomplete form. It is in this context this project receives warm acceptance at all levels concerned.

This study is aimed at building a data base on the existence of sacred groves in Kerala. The work in Thiruvananthapuram District has been completed and report submitted in 2013. Against earlier anticipated 100 numbers of sacred groves (SG) it finally turned out to be 452. The report on Kollam district submitted in 2015 gives the list of 895 against 100 and odd anticipated earlier. In the same manner in this report the total number of sacred groves comes to 1231. Besides taking an inventory on the number of SGS available, information on the extent of land under vegetation, ownership, legal status, geographical location including GPS data, assigning Id number and such other important information find a place in this report. The impact of such information on these patches of vegetation which have been surviving since long and its socio-ecological scenario would amply help policy makers establish guidelines and launch schemes for conservation without interfering with the freedom of the custodians.. **The absence of such information in the earlier available data base over the state qualifies this study a unique venture.**

This report is presented in two parts. Part 1 contains inventory details, study on vegetation, ecological aspects and Socio-cultural studies, along with photographs of important sacred groves and plants. Part II comprises various statements on location, geographical information, management details and Id numbers computed for each sacred grove taluk wise. Maps showing the location of all the SGs taluk wise are also included.

As already explained, this report is unique in its objectives.

Objectives

- A comprehensive inventory of sacred groves in [Kozhikode](#) District with location
- List of flora with analysis on distribution of plant species,
- Identification of important and rare plant species in detail by an expert with regard to selected sacred groves.

- Ecological status based on field observations and reported facts.
- **Assigning** ID numbers to all the SGs.
- Preparation of a data base on folklore and folk arts .
- Assess impact of the sacred groves in socio-economic scenario.
- Providing photographs of all important species existing in the SGs
- Mapping SGs taluk wise showing the location of SGs based on GPS readings.
- Locate the threats being confronted in conservation of sacred groves.
- Recommendations

METHODOLOGY

Area of Study

The project proposal envisages taking up the study in all the 14 districts of Kerala. This report covers Kozhikode district. The district stretches along the shore of Arabian Sea for a total area of 2,206 sq km and population of 26.137 lakhs. There are four taluks viz. Kozhikode, Koilandy, Vadakara and Thamarassery. Thamarassery taluk is in the middle belt. In the others most of the area form coastal belt. Annual rainfall is 254 cms. Mean and max. Temperatue is 22^o and 35^o respectively. This area lies between Latitudes N 11^o 08' and 11^o 50' and Longitudes E 75^o 30' and 76^o 08'.

As regards soil is concerned, coastal belt has sandy loam and in the rest of the area is mostly laterite. Low acidity is predominant along coastal belt.

Collection of available data

Before taking up field study a complete list of sacred groves had to be obtained. The list of Sacred Groves (SGs) available with Social Forestry Division Kozhikode contained only around 300 numbers. Hence publicity was given in news papers more than once in the district calling for the information from the custodians of SGs to locate the SGs. In response to it IFK received more than 200 applications giving all the relevant details. It is after that the field work was started. More information started coming during field visit by word of mouth.

During the course of field work the field team received information locally about nearby sacred groves for which no application had been received. Such SGs have also been visited and documented. Finally, from available data with Social Forestry, publicity in the press and through word of month, the number of sacred groves totaled 1231 against the earlier recorded number below 100 in the past.

Constitution of Field Team

One retired Section Forest Officer assisted by a local supporting hand formed one field team. Thus there were five such teams. They were provided with necessary format for recording details and G.P.S equipment for recording latitudes and longitudes. Their work was supervised and checked by two retired ACFs (President and Secretary of IFK Kozhikode Chapter) and at random by the senior members of the IFK Executive Committee.

Format for recording data

A format was designed for the collection of data while visiting a sacred grove which proposed to collect information such as - Name of SG, Location, Address of custodian, Extent of land under vegetation, Sy. No/ Village, existence of Compound wall, Ponds, Fauna locally seen or reported etc. Further, details on inspection would carry the vegetation, legal status, information of presiding deity, temples attached including other facilities with a brief note on the route to reach the SG from a known place and similar essential facts in respect of each grove.

Supervision of data collection and expenditure

The IFK Executive Committee, meeting from time to time, took appropriate decisions on expenditure and undertook checking the data collected according to the format by making field inspections at random.

Extent of sacred grove

The extent of sacred grove is recorded based on the actual area under vegetative cover. The documents if any produced by custodian may include the extent of temples or other ancillary areas. In such cases the actual area under vegetation is taken based on the experience of forest staff. They have also made it mandatory to record it in a very conservative manner in order to avoid any distorted figure on the higher side. Minimum size is governed by richness of vegetation and local acceptance. Recording survey no. and other details are done based on information provided by persons in charge of the SG. Verification of authentic records if readily available only could be done as it was not generally feasible everywhere.

Legal status

Legal status was looked into to classify the sacred groves into the following categories as could be verified from reliable records or information. (i) Managed by

Devaswam Board (ii) Under public Trust, (iii) Under Local Committee (iv) Private (includes family trust or kudumba ownership). More details about these will appear in the chapter on Sociological Dimensions.

Documentation of Flora and Fauna

Generally the field team is conversant with the identification of the species and common shrubs. But they have also taken the help of persons conversant with the identification of uncommon shrubs and herbs including medicinal plants. In addition services of Botany Expert was obtained to identify and arrive at the complete list of flora in selected sacred groves. He has provided total inventory of plant species in as much as 29 selected SGs distributed over all the four taluks and the lists are included in the report.

Mapping

Location of all the SGs has been marked in maps talukwise based on GPS readings. The serial numbers have been allotted village wise. These serial numbers have been adopted as Id numbers of the sacred groves.

CHAPTER II

REVIEW OF LITERATURE

There is plenty of literature authored by various scholars such as Gaikward, Oliver Kind, Dr. Raviprasad Rao, Muhamed Jafer Pilot & Radhakrishnan, Mohan C.N & Ganga Prasad, Unnikrishnan, U. M. Unnikrishna and others on the character and status of sacred groves in general which constitute the basis of this chapter partly. In addition there are various articles on SGs in other countries available by surfing internet.

The sacred Groves came into existence thousands of years ago and in general they are dedicated by local communities to their ancestral spirits or deities. They have been defined by many authors like those above and all the definitions carry more or less the same meaning. The following are the views that emerge out of their contributions.

According to the above authors Sacred Groves (SG) are a patches of vegetation or group of trees protected by the local people through religious and cultural practices evolved to minimize destruction. Sacred groves, the community based repositories of biological diversity, are segments of landscapes typically covering a patch of vegetation with perennial water resources. They are patches of wilderness conserved owing to their perceived importance attached to a village deity.. Sacred grove is an age-old tradition where a patch of forest is dedicated to local deities and none is allowed to cut plants or to harm animals. Sacred groves are community based monuments of biological diversity.

Global Scenario

Sacred Groves (SG) are distributed across the globe and diverse cultures recognize them in different ways encoding various rules for their protection. Sacred groves associated with religious beliefs were there in many countries from time immemorial. Sacred groves have been reported from many countries like Mexico, Ghana, Nigeria, China, Syria, Europe and America.

In the **Caucasus Mountains** (Russia) each community had its own sacred grove. They worshipped these as sanctuaries built among age old trees which were never to be cut (**picture Plate- II**).

The Greek and Roman landscapes were dotted with many sacred places which contain groves of trees and water springs. Groves were in existence in Greece and

Rome long back. The most famous sacred grove in Greece was Oak Grove at **Dodona**. Outside the walls of Athens the site of the Academy was a sacred grove of olive trees.

Resources from the groves were used for religious purposes. Animals like goats and deer were captured and offered to appease the deity. Trees in the groves could be used for building temple. Wood from sacred trees was believed to have magical powers when fashioned into statues of gods. This kind of multiple use by relaxing strict measures on conservation caused decline of SGs in some parts of Europe. One great **Druidic grove in south Gaul (Rome) was cleared by Ceaser's troops** in an attempt to remove spiritual powers inherent in the grove. There was a grove in front of the **church in Weissenbach an der Triesting.**(picture *PLATE II*) In Europe sacred groves survived in the Baltic states longer than in other parts .The sacred grove in island Estonia is the one. (See picture *Plate-I*)

In Tuna a southern province in **China**, the inhabitants did not dare to touch the native mountain forest because of their fear on wrath of God.

In Africa, among the Kikuyu ,groves of *Migumu* tree are sacred and those trees were not to be cut. In these sacred groves, sheeps and goats were sacrificed and prayers offered for rain or fine weather or for curing diseases . In Kenya , *Kaya* a sacred forest considered to be an intrinsic source of ritual power and origin of cultural identity . It is also a place of prayer for members of a particular ethnic group- Mijikenda people. The flora was used solely for collection of medicinal plants. Cutting and clearing trees were not permitted. In **Nigeria the Osum-Osobgo sacred grove** containing dense forests is dedicated to fertility god in Yoruba mythology and is dotted with shrines and sculptures . This grove was designated as a **UNESO World Heritage Site** in 2005.(*picture- Plate-I*)

In **Japan** the Seifa-Utaki contains a sacred grove, with rare indigenous trees like *Kubanoki* (*a kind of Palm*) and *Yubunikkei*(*Cinnamomum japonicum*) This is UNESCO World Heritage Site of 2003.

A grove near **Leona** all the way down a mountain side up to sea was dedicated to the goddess Artemis at the instance of Alexander the Great. Artemis was considered to be the protector of animals and plants.

In **America-The Bohemian Grove located in California** is a privately owned sacred grove and in mid July each year they perform symbolic rituals such as Cremation of Care. (*picture- Plate-I*)

Attitude by different Religions in the world

Due to the rise in dogmatic religions like Christianity and Islam, which advocated faith in one God the tradition of maintaining sacred groves and sacred trees did not get an unconditional flow of support though sacred groves exist in many countries in some form or other among those religions. We can still get lot of instances to show that this attachment to trees coupled with spiritual beliefs exist among different religions also other than Hinduism.

In the kingdom of Shower in Arabia, tree worship was prevalent in 1860 for getting rain. Muslim Persians invoke the spirits supposed to dwell in certain trees by hanging on the branches, pieces from garments during some ceremonial occasions.

In Indonesia *Ficus bengalensis* is considered sacred. They believed the existence of holy spirits in the tree which would ensure availability of clean water.

There is a Parish Church of Weissenbach Treisting in Lower Austria, Europe, a grove exists in front of the church. In Syria there is a grove sacred dedicated to Adonis at Afqa.

Buddha himself gained realization and enlightenment under a pipal tree. Buddha is reported to have been born in a sacred grove-Lumbinivana-full of Sal trees.(Gadgil 1985)

Indian Scenario

Of course in India the major religion that holds and protects sacred groves is Hindism, having several living and non-living elements of nature as objects of worship.

The general belief that sacred groves are maintained by Hindu community only is not fully correct. Other communities also have shown faith in the sacred trees. A little Sal forest in Gorahpur is maintained by a Muslim saint “Mian Sahib”. Nothing was allowed to be cut except for lighting sacred fire.

In Kolhapur district there exists a small sacred grove on the land of a Muslim peasant. This land was purchased by him from a Brahmin priest in 1962. The Muslim peasant observes “agrosaat” and “diwalsaat” (pre-sowing and post sowing ceremonies) at this sacred grove along with adjoining Hindu peasants.

In Murshidabad district (Ragnathgunj town in West Bengal), in a mazaar-a-pir- is located amidst a grove . On the top of the grave three trees –neem, mahakal, and bel are there which are worshiped by Hindus.

In the heart of Midnapur city, a sacred grove is dedicated to a pir called Hazrat Balak Shahid Rehmatullah Elachi, who died a few centuries back. There is a sacred well inside known as “Sheikh Kua”. People irrespective of cast or religion fetch water from this well as it is believed to have powers to cure diseases.

In Midnapur itself there is another big sacred grove dedicated to a pir called Baro Huzur and the SG is known as “Tapovan”. This is located at Istreegunj on the western fringe extending over three acres .Entry is restricted here. Wearing shoes is not allowed. Here also there is a sacred pond from where water is considered to have power to cure diseases.

If we take the case of Sabarimala Poonkavanam a typical and extensive sacred grove of Lord Ayyappa, holds the legendary association of “Vaver Swamy” a muslim, at Erumely which is still in vogue. These facts stand to reason that sacred grove is not alien to communities other than Hindu..

Number of Sacred Groves

The total number of sacred groves in any state or region estimated and reported is not based on any authentic study. All the reports on the number of SGs go by rough estimation as can be seen below. The rough estimate of the number of sacred groves in India is around 14000 with an extent of about 55000 hectares . (Nalinakshan P.K – 2004). Another statement is that there are more than 50,000 sacred groves in India conserving the indigenous flora and fauna for the present and future generations. (Induchoodan N.C. Dr:) . It has been estimated that total number of sacred groves in the country lie between 100,000 and 150,000 (Malhotra,: 1998)- {Kannan C.S. Warriar, Kunhikannan. C & Gunasekharan. T – 2004}. However the overall picture in respect of India as a whole is not a matter of study in this report. But this calls for a comprehensive study over the whole country.

In the beginning of the 19th Century, there were more than 30,000 groves in Kerala. A recent survey revealed that only less than 1000 sacred groves exist and most of them are less than 10 m² in extent. (Mohanan C.N. & Ganga Prasad.A). . It may be mentioned that Ward and Conner (1927) reported about 15,000 sacred groves in Travancore and Cochin regions ,of Kerala. On the other hand, it is estimated recently that only 2000 well preserved sacred groves are present in the whole state

(Rajendra Prasad, 1995) {Chandrasekhara U.M -2004}. Kerala State is having only 556 sacred groves preserved with maximum numbers in Kozhikode (148) followed by Kasargod (112) and Kannur (67) in the North and Thiruvananthapuram (49) and Kollam (48) districts in the South- (Unni P N & Anupama C). According to ENVIS Centre on Conservation of Ecological Heritage and sacred Sites of under Govt. of India 644 SGs have been documented in Kerala . As for **Kozhikode District** the estimation on the number of SGs is 22 by Dr. Induchoodan and, 18 by ENVIS Centre. The Web Site of Kerala Forests and Wildlife Department adopted the figure -1500 for the state (2009). It is evident that there is no reliability in the reports by various authors on the projected number of sacred groves as well as the details, and they are all far from actual position as can be seen in this study.

Flora

The vegetation in sacred groves is generally immensely rich in diversity of species depending on the conditions of habitat prevailing in various regions.. Studies made so far made till 2004 listed out 805 species of flowering and non-flowering plants belonging to 121 families, comprising 673 dycotyledons belonging to 95 families and 126 monocotyledons belonging to 20 families (Unni P.N. & Anupama - 2004).

Majority of the species belong to families such as Annonaceae, Menispermaceae, Capparidaceae, Malvaceae, Rutaceae, Meliaceae, Vitaceae, Myristicaceae, Fabaceae, Anacardiaceae, Rubiaceae etc.

Unni. P.N and Anupama have also provided a table listing the above 805 species in their paper ‘Conservation of sacred groves of Kerala: Need and strategies’ presented at the National Workshop on Sacred Groves held in September 2004 at Kozhikode. According to Gadgil and Vivek (1976) , sacred groves are the treasure of rare and endemic species. Many workers supported this view. For example, analysis of phytogeographical elements of sacred groves of Kerala indicates that 721 species (including Gnetum ula) recorded from the sacred groves 154 are endemic to western Ghats and 33% of them are trees (Induchoodam 1998)-{ Chandrasekhara u.m.2004} .

Fauna

Similarly, fauna in the sacred groves have been listed out .which contain Amphibians-3, reptiles 10, and birds 164. This includes 25 species of birds that breed in sacred groves. The Sacred groves are the last shelter of the common fauna including a variety of insects, reptiles, mammals, birds and micro-organisms. Among the animals, a few are enlisted as threatened in India such as the fresh water and

terrestrial tortoises, python, monitor lizard, mongoose, palm civet, Nilgiri Languor, Slender Loris, several amphibians, reptiles, aves and insects. The Malabar large spotted civet presumed to be extinct is reported last from some of the groves in Malabar. Birds, including a few migratory ones, select groves for nesting and breeding. A phenomenon known as over wintering (staying without going back) among winter visitors of birds is also noticed in some of these groves of Kerala. (Mohanan C.N. to Ganga Prasad A-2004).

The major fauna of the groves comprise of snakes (cobra, viper and rat snake) water hen, toddy cat and mongoose. The pond contains various fishes, tortoise, frog and waters snake. (KannanC.S. Warriar, KunhiKannan C and Gunasekaran T-2004).

The birds and bats find their natural nesting places in the sacred groves. They, in addition to their scavenger role check the insect and pest population. The bird droppings rich in phosphorous replenish the phosphorus deficient soil of the region. Snake and mongoose find their home in sacred groves. The snake controls the rodent population, which if left unchecked will destroy the crops of the locality. The snake population is kept under check by the mongoose. Insect fauna, particularly the bees make their hives in sacred groves and facilitate the cross pollination of many plants species of the locality. (U.M.Chandrashekara-2004)

Ecological functions.

According to Rajendraprasad (1995), sacred groves show high porosity and low bulk density compared to the soils of nearby areas. He also observed the thick litter covers and channels created by soil micro-fauna together enhanced the water retention, root system development, gaseous exchange and heat conductance. The role of sacred groves as micro-watershed in local area has been recognized by many workers. (Chandrashekara U.M.- 2004)

As an ecosystem, they help in soil, water and nutrient conservation and the ponds and streams adjacent to these groves are perennial water sources, which adequately explain their hydrological significance, though not evidenced through results of scientific investigation. (Unni P.N.& Anupama C-2004)

CHAPTER III

RESULTS OF STUDY

General

The study revealed that there are 1231 sacred groves covering an extent of around 141 ha. of vegetative cover. Out of the four taluks in this district kozhikode taluk contain the maximum number namely 653. Minimum is accounted by Thamarassery. The extent of SGs varies from less than 3 cents to 24 acres. Those less than 3 cents form only 2%. The maximum is in the classe above 10 cents. Most of these SGs are confined to the coastal belt with sandy and sandy loam. As regards ownership 83 % come under Private ownership. Those under Public trust and Devaswam Board are just a few.

AREA WISE DISTRIBUTION OF SACRED GROVES IN KOZHIKODE DISTRICT

Sl. No.	Area class	No. of Sacred Groves	Extent (Cents)
1	Less than 3 Cents	27 Nos.	54 Cents
2	3 Cents to 5 Cents	298 ,,	1261 ,,
3	6 Cents to 10 Cents	409 ,,	3504 ,,
4	11 Cents to 25 Cents	290 ,,	4889 ,,
5	26 Cents to 50 Cents	112 ,,	4310 ,,
6	51 Cents to 100 Cents	53 ,,	4402 ,,
7	101 Cents to 500 Cents	34 ,,	7375 ,,
8	Above 500 Cents	8 ,,	9025 ,,
	Total	1231 Nos.	34820 Cents(348.20Acres) (141.00 Ha)

As can be seen in the above table, there are 27 SGs which are below 3 cents. They are confined to Kozhikode Taluk. Though very small in extent they have been included in this report owing to the importance on various aspects. In (SG No. [Kkd/2](#))-Purakkad Bhadrakali Kirathamurthy grove local acceptance is very high as seen from the number of devotees and the degree of sanctity and punctuality followed

there. Besides there are very big typical trees like Ficus, Cheru etc even though the number is very few. Some others have historical importance. Punathil bhagavathy kavu (SG.No.Kkd/26) has only 2 cents under vegetation. It has historical importance. It was originally with Hindus. Afterwards it went into the hands of Muslims. The Muslims later handed over it to Hindus for proper maintenance. Even festivals are organized every year. Sridadan kavu near Bepore (SG No Kkd/64) also has only 2 cents. This is attached to a temple and Theyyam a rare celebration is conducted here. Thus there are some such overriding factors that led us to include them also. Such sacred groves are not likely to vanish in course of time.

TALUK WISE DISTRIBUTION

KOZHIKODE TALUK (Kkd)

Sl. No.	Area class	No. of Sacred Groves	Extent (Cents)

CHAPTER IV

COMPOSITION-VEGETATION

The vegetation in sacred groves enjoys a higher level of protection from fire besides freedom from biotic interference. It is again the abode of many fauna which contribute to its diversity based on soil conditions. An attempt is made in this chapter to sum up briefly the various plants growing in a given set of locality factors prevailing..

Vegetation

Tree crop- The vegetation has certain distinctive ecological characteristics such as clear tiers of trees, shrubs herbs, besides the climbers, epiphytes parasites etc. The commonly seen trees in the Sacred Groves are *Artocarpus hirsutus*, *Adenanthera pavonina*, *Alstonia scholaris* (Ezhilampala), *Caryota urens*, *Holigarna arnottiana* (Charu), *Hopea ponga* (Thambakam), *Strychnos nux-vomica* (Kanjiram), *Hydnocarpus pentandra* (Marotti), *Sterculia balangas* (Thondi) etc. Though they are common their frequency of occurrence varies. *Strychnos nux-vomica* is found to be the most common species. There is abundant representation from Families such as Euphorbiaceae, Rubiaceae, Fabaceae, Dipterocarpaceae, Aracaceae, Menispermaceae and Icanthaceae. Icanthaceae is one family which comprises quite a number of medicinal plants like various species of Gomphandra, Sarcostigma and Miquelia which form the source of a number of derivatives providing rich alternative for anticancer compounds..

The other species that are found more common than in the southern region of Kerala are *Aglaia elaeagnoidea* (punyava), *Antidesma ghaesembilla* (pothiruvai), *Corypha umbraculifera* (kudappana), *Cynometra travancorica* (kooori), *Dipterocarpus indicus* (kalpine), *Litsea coriacea* (puttuthala), *Falconeria insignis* (kalmaram), and *Syzygium caryophyllatum*. The last one shows stunted growth and found common on heavy lateritic soil. Rare and threatened trees such as ***Myristica malabarica* (Ponnampoovu)**, ***Gymnacranthera farquhariana* (Undappayin)** ***Cynometra travancorica* and *Syzygium travancoricum* (Kulavetti)** were also enumerated from the Sacred Groves.

Shrubs

The diversity among shrubs are comparatively low. The commonly found shrubs are *Ixora coccinea* (Thetchi), *Chassalia ophioxylodes* (Vellakurinji), *Tabernaemontana heyneana* (Kundalappala), *Memecylon umbellatum* (Kasavu),

Pavetta indica (Pavetta), *Grewia microcos* (Kottaka), *Leea indica* (Njellu), *Clerodendron infortunatum* (Peruvalam) etc. In addition *Canthium rheedei* having anti spasmodic properties etc, *Dichapetalum geloniodes* –a poisonous plant are seen in Vallikkattukavu. *Flacourtia indica* (karimulli), *Glycosmis pentaphylla* (panal), *Ixora polyantha* (kattu thechi), *Leea indica* (jekku), Some of them are very valuable as having medicinal properties. *Pavetta indica*, *Capparis moonii*, *Clerodendron serratum* are among these. The last one is used in a number of Ayurvedic preparations including as a potential source of chemotherapeutic agent. *Nothopegia travancorica* (avukkaram), *Rauvolfia tetraphylla*, *Allophyllus serratus*, *Glycosmis macrocarpa*, and *Rauvolfia tetraphylla* having high medicinal value also add to this stock.

Climbers

Occurrence of climbers and herbs is abundant compared to southern districts. In many sacred groves the number of climber species vary from 20 to 45. Families such as Bignoniaceae, Leguminosae, Hippocretaceae, Vitaceae and Menispermaceae are rich in are rich in climbing plants. The family Menispermaceae contributes very important climbers like *Coscinium fenestratum* (Medicinal & Endangered), *Anamirtha coculus*, *Tinosperma* Sp. etc. *Coscinium fenestratum* is seen in Thechottukavu in Narikuzhi village of Thamarassery Taluk. In addition, *Iconocarpus frutescens* of Apocynaceae, *Bauhinia scandens* and *B.phoenicea* of Caesalpinaceae, *Dioscoria pentaphylla* of Dioscoriceae and *Erycibe paniculata* of Convolvulaceae are met with in these sacred groves which explain the richness of biodiversity coupled with medicinal properties.

There are also some plants which grow as free standing shrubs like *Croton* species when they fail to encounter mechanical support for climbing by winding. There are number of the climbers that have tendrils like *Hugonia mistax*, *Anamirtha sp.*, *Cissus sp.* etc which go up the top canop of trees and spread. A few climers grow as creepers and grow along the darkest part and ultimately get at the trunk of the large tree for support.

Herbs

The occurrence of very valuable herbs having medicinal properties is worth mentioning in this respect. Some of the important herbs are the following-

- i. *Scorparia dulics*-Family-Scrophurialiaceae, which ic known as *Kallurukki* in local language, has number of medical applications. It is anti-malarial, anti-ulcer,

antipyretic besides possessing aphrodisiac activity and cyto-toxic activity against cancer cells.

- ii. *Spermacoce articularis*-Rubiaceae family –(*Kudalchurukki*) has medicinal uses.
- iii. *Tridax porcumbens* –Daisy family_ (*Kummini pacha*) has antiviral, antioxidant and wound healing powers.
- iv. *Anaphyllum wightii*-Areaceae- (*Keerikizhangu*)- is a tribal medicine used in treatment of scabis, as antifungal and as antidote against snake bite.
- v. *Lagenendra meeboldii*. Araceae- This is a fish feed seen confined to the marshy banks of SGs.
- vi. *Pentanema indicum*-Sunflower family-is again a tribal medicine good for abdominal pain, throat disorder, and as oral contraceptive.
- vii. *Geophila repens*-Rubiaceae-(*Karimuthil*), is almost a creeper with conspicuous red fruits- is an antifungal agent, but edible also.

In the SGs existing on coastal region *Vatica chinensis-Holigarna arnottiana-Hydnocarpus pendandra Association* could be observed. Other trees such as Ficus species like tsjahela or tinctoriaamplissima, Strychnos nuxvomica , Shrubs like Ixoracoccinea,Glycosmis pentaphylla, climbers like Cansjera rheedei, Abrus pulchellus etc. are there. A typical SG is Poyilkavu in Koilandy Taluk.

List of Important Plants

Sl.no	Scientific name	Common name	Remarks
TREES – 23			
1	<i>Algaia elaeagnoidea</i>	Punyava Meliaceae	<i>Fruits edible and anticancer-</i> Perumana kavu-Vdk-23- Picture-22

CHAPTER V

Detailed List of Plants in Selected Groves

As many as 28 sacred groves existing in different taluks have been selected for detailed survey by taxonomist and the result is tabulated in to trees, shrubs, climbers and herbs in respect of each SG as given below.

1. Azhiyurkorath Nagaraja Temple, Kozhikode (Vdk-35)

No.	Scientific name	Habit	Common name
1.	<i>Adenantha pavonina</i>	Tree	Manchadi
2.	<i>Aglaia elaeagnoidea</i> (<i>Aglaia roxburghiana</i>)	Tree	Njazhal
3.	<i>Caryota urens</i>	Tree	Eerampana
4.	<i>Cassia fistula</i>	Tree	Kanikonna
5.	<i>Chrysophyllum cainito</i>	Tree	Star apple
6.	<i>Cinnamomum verum</i>	Tree	Karuva
7.	<i>Ficus benghalensis</i>	Tree	Peral
8.	<i>Ficus drupacea</i> Thunb. var. <i>pubescens</i> (<i>Ficus mysorensis</i>)	Tree	Manja aal
9.	<i>Ficus religiosa</i>	Tree	Arayal
10.	<i>Holigarna arnottiana</i>	Tree	Charu
11.	<i>Hopea ponga</i> (<i>Hopea wightiana</i>)	Tree	Eeyakam
12.	<i>Hydnocarpus pentandra</i> (<i>Hydnocarpus wightiana</i>)	Tree	Marotti
13.	<i>Lannea coromandelica</i>	Tree	Karasu, Udhi
14.	<i>Litsea coriacea</i>	Tree	Maravettithaali
15.	<i>Mallotus philippensis</i>	Tree	Sindooram, Kurangumanjal
16.	<i>Mesua ferrea</i>	Tree	Churuli
17.	<i>Mimusops elengi</i>	Tree	Elenji
18.	<i>Olea dioica</i>	Tree	Idala

19.	<i>Sterculia guttata</i>	Tree	Kavalam
20.	<i>Strychnos nux-vomica</i>	Tree	Kanjiram
21.	<i>Syzygium caryophyllatum</i>	Tree	Cherunjaval
22.	<i>Syzygium cumini</i>	Tree	Njaval
23.	<i>Trema orientalis</i>	Tree	Amathali, Pottama
24.	<i>Zanthoxylum rhetsa</i>	Tree	Mullilam
25.	<i>Anitdesma acidum</i>	Shrub	Ariyaporiyan
26.	<i>Bambusa bambos</i>	Shrub	Mula, Illi
27.	<i>Canthium angustifolium</i>	Shrub	Kattaramullu
28.	<i>Chassalia ophioxyloides</i>	Shrub	Vellakurinji
29.	<i>Chromolaena odorata</i> (<i>Eupatorium odoratum</i>)	Shrub	Communistpaccha
30.	<i>Cycas circinalis</i>	Shrub	Eenth
31.	<i>Glycosmis pentaphylla</i>	Shrub	Panal
32.	<i>Gomphia serrata</i>	Shrub	Valermani
33.	<i>Grewia nervosa</i>	Shrub	Cherikotta
34.	<i>Hibiscus hispidissimus</i>	Shrub	Panachan
35.	<i>Ixora malabarica</i>	Shrub	Cherukuruva
36.	<i>Murraya koenigii</i>	Shrub	Kariveppu
37.	<i>Nothapodytes nimmoniana</i> (<i>Mappia foetida</i>)	Shrub	Peenari, Pulipatcha
38.	<i>Nyctanthes arbortristis</i>	Shrub	Pavizhamulla
39.	<i>Syzygium zeylanicum</i>	Shrub	Poochapazham
40.	<i>Tabernaemontana heyneana</i>	Shrub	Koonampala
41.	<i>Triumfetta rhomboidea</i>	Shrub	Ottukai
42.	<i>Acampe pameorsa</i>	Herb	Maravazha
43.	<i>Achyranthes aspera</i>	Herb	Kadaladi
44.	<i>Canscora diffusa</i>	Herb	Jeerakapullu
45.	<i>Capillipedium assimile</i>	Herb	
46.	<i>Cyathula prostrate</i>	Herb	Cherukadaladi
47.	<i>Desmodium triquetrum</i>	Herb	Ammaivettilla
48.	<i>Eleusine indica</i>	Herb	
49.	<i>Hyptis suaveolens</i>	Herb	Nattapoochedi
50.	<i>Ischaemum indicum</i>	Herb	
51.	<i>Justicia procumbens</i>	Herb	
52.	<i>Mimosa pudica</i>	Herb	Thottavadi
53.	<i>Naregamia alata</i>	Herb	Nilanarakam
54.	<i>Oplismenus compositus</i>	Herb	
55.	<i>Pennisetum pedicellatum</i>	Herb	

56.	<i>Pennisetum polystachyon</i>	Herb	Pothapullu
57.	<i>Phaulopsis imbricate</i>	Herb	
58.	<i>Scleria parvula</i>	Herb	
59.	<i>Sida acuta</i>	Herb	Malamkurunthotti
60.	<i>Spermacoce latifolia</i>	Herb	Tharavu chedi
61.	<i>Zingiber nimmonii</i> (<i>Zingiber cernnum</i>)	Herb	Malayinchi
62.	<i>Abrus pulchellus</i>	Climber	Kattukunni
63.	<i>Acacia torta</i>	Climber	Kakkincha
64.	<i>Anamirta cocculus</i>	Climber	Pollakkai
65.	<i>Centrosema molle</i> (<i>Centrosema pubescens</i>)	Climber	Kattupayar
66.	<i>Cissus heyneana</i>	Climber	
67.	<i>Cissus latifolia</i>	Climber	Chunnambuvalli
68.	<i>Dioscorea bulbifera</i>	Climber	Kattukachil
69.	<i>Dioscorea wallichii</i>	Climber	
70.	<i>Gloriosa superba</i>	Climber	Menthonni
71.	<i>Ichnocarpus frutescens</i>	Climber	Parvalli
72.	<i>Ipomoea mauritiana</i> (<i>Ipomoea palmata</i>)	Climber	Palmuthakku
73.	<i>Ipomoea triloba</i>	Climber	
74.	<i>Jasminum coarctatum</i> (<i>Jasminum rottlerianum</i>)	Climber	Kattumulla
75.	<i>Jasminum malabaricum</i>	Climber	Kadambavalli
76.	<i>Lygodium scandens</i>	Climber	Polivalli, Naippalli
77.	<i>Merremia umbellate</i>	Climber	Koravalli
78.	<i>Mimosa invisa</i>	Climber	Anathottavadi
79.	<i>Mussaenda frondosa</i>	Climber	Vellila
80.	<i>Pothos scandens</i>	Climber	Varivalli
81.	<i>Rourea minor</i>	Climber	Kooriel
82.	<i>Salacia fruticosa</i>	Climber	Ponkorandi
83.	<i>Sarcostigma kleinii</i>	Climber	Velutha Odal
84.	<i>Smilax zeylanica</i>	Climber	Kareelanchi
85.	<i>Tetrastigma leucostaphylum</i>	Climber	
86.	<i>Tiliacora acuminata</i>	Climber	Vallikanjiram
87.	<i>Uvaria narum</i>	Climber	Narumpanal
88.	<i>Zanonia indica</i>	Climber	Peenarvalli
89.	<i>Ziziphus oenoplia</i>	Climber	Cheruthodali
90.	<i>Erycibe paniculata</i>	Cimber	Erumathali

2. Karimala Kaavu, Balussery, Kozhikode

No.	Scientific name	Habit	Common name
1.	<i>Adenantha pavonina</i>	Tree	Manchaadi
2.	<i>Aegle marmelos</i>	Tree	Koovalam
3.	<i>Aglaia elaeagnoidea</i>	Tree	Njazhal
4.	<i>Ailanthus triphysa</i>	Tree	Matti
5.	<i>Alangium salvifolium</i>	Tree	Ankolam
6.	<i>Alstonia scholaris</i>	Tree	Ezhilampala
7.	<i>Anacardium occidentale</i>	Tree	Kasumaavu
8.	<i>Antiaris toxicaria</i>	Tree	Maravuri
9.	<i>Antidesma bunius</i>	Tree	Araporiyan
10.	<i>Aphanamixis polystachya</i>	Tree	Chemmaram
11.	<i>Aporosa acuminata</i>	Tree	Neervetti
12.	<i>Aporosa cardiosperma</i>	Tree	Aechil, Vetti
13.	<i>Artocarpus heterophyllus</i>	Tree	Plaavu
14.	<i>Artocarpus hirsutus</i>	Tree	Ayani, Aanjili
15.	<i>Carallia brachiata</i>	Tree	Vankana, Vallabham
16.	<i>Caryota urens</i>	Tree	Eerampana
17.	<i>Cinnamomum verum</i>	Tree	Ilavangam
18.	<i>Cipadessa baccifera</i>	Tree	Potti
19.	<i>Cocos nucifera</i>	Tree	Tengu
20.	<i>Cynometra travancorica</i>	Tree	Koori
21.	<i>Diospyros paniculata</i>	Tree	Karimaram
22.	<i>Diospyros peregrine</i>	Tree	Panachhi
23.	<i>Dipterocarpus indicus</i>	Tree	Vella-ayani, Kalpayin
24.	<i>Elaeocarpus tuberculatus</i>	Tree	Kaaramaram
25.	<i>Ficus benghalensis</i>	Tree	Peraal
26.	<i>Ficus religiosa</i>	Tree	Arayaal
27.	<i>Gliricidia sepium</i>	Tree	Sheemakkonna
28.	<i>Glochidion zeylanicum</i>	Tree	Nellikkaappuli
29.	<i>Grewia tiliifolia</i>	Tree	Chadachhi/Chaliru
30.	<i>Holigarna arnottiana</i>	Tree	Cheru
31.	<i>Hopea parviflora</i>	Tree	Irumbakam
32.	<i>Hopea ponga</i>	Tree	Eeyakam
33.	<i>Lagerstroemia microcarpa</i>	Tree	Venthekku
34.	<i>Lepisanthes tetraphylla</i>	Tree	Kulappunna
35.	<i>Litsea coriacea</i>	Tree	Maravettitthali
36.	<i>Mallotus philippensis</i>	Tree	KuranguManjal
37.	<i>Mangifera indica</i>	Tree	Maavu
38.	<i>Memecylon randerianum</i>	Tree	Kaasavu

39.	Mimusops elengi	Tree	Elenji
40.	Olea dioica	Tree	Edala
41.	Oroxylum indicum	Tree	Palakappayyaani
42.	Plumeria rubra	Tree	ChuvannaChempakam
43.	Pongamia pinnata	Tree	Ungu
44.	Santalum album	Tree	Chandanam
45.	Saraca asoca	Tree	Ashokam
46.	Schleichera oleosa	Tree	Poovam
47.	Scleropyrum pentandrum	Tree	Irumulli
48.	Sterculia guttata	Tree	Peenaari
49.	Stereospermum colais	Tree	Paathiri
50.	Strychnos nux-vomica	Tree	Kaanjiram
51.	Syzygium caryophyllum	Tree	Cherunjaara
52.	Syzygium cumini	Tree	Njaaval
53.	Tectona grandis	Tree	Thekku
54.	Terminalia bellirica	Tree	Thaanni
55.	Terminalia catappa	Tree	Badaam
56.	Terminalia chebula	Tree	Kadukka
57.	Vitex altissima	Tree	Myla
58.	Wrightia tinctoria	Tree	Kambippaala
59.	Xanthophyllum arnottianum	Tree	Mottal
60.	Xylia xylocarpa	Tree	Irul
61.	Zanthoxylum rhetsa	Tree	Mullilam
62.	Allophylus serratus	Shrub	Mukkannapezhu
63.	Antidesma acidum	Shrub	Aasarippuli
64.	Briedelia stipularis	Shrub	Kanjikkottam
65.	Canthium angustifolium	Shrub	Kaaramullu
66.	Canthium coromandelicum	Shrub	Kaaramullu
67.	Canthium rheedei	Shrub	Karinkaara
68.	Catunregam spinosa	Shrub	Kaara
69.	Chassalia ophioxylodes	Shrub	Vellakkurinji
70.	Chromolaena odorata	Shrub	Communist Pacha
71.	Clerodendrum infortunatum	Shrub	Peruvelam
72.	Clerodendrum serratum	Shrub	Cheruthekku
73.	Dendrocalamus strictus	Shrub	Mula
74.	Dendrophthoe falcate	Shrub	Itthikkanni
75.	Duranta erecta	Shrub	Velipoo
76.	Ecbolium ligustrinum	Shrub	Odiyamaadantha
77.	Fagraea ceilanica	Shrub	Modakam
78.	Falcourtia indica	Shrub	Aghori
79.	Glycosmis pentaphylla	Shrub	Paanal
80.	Gomphia serrata	Shrub	Chavakkambu
81.	Grewia nervosa	Shrub	Cherikkotta
82.	Hibiscus hispidissimus	Shrub	Panachan

83.	<i>Hibiscus rosa-sinensis</i>	Shrub	Chemparathi
84.	<i>Ixora coccinea</i>	Shrub	Thetchi
85.	<i>Ixora finlaysoniana</i>	Shrub	Vellathetchi
86.	<i>Justicia gendarussa</i>	Shrub	Vaathamkolli
87.	<i>Leea indica</i>	Shrub	Njallu/Erattayani
88.	<i>Maesa indica</i>	Shrub	Kaattuvizhaal
89.	<i>Meineckia parvifolia</i>	Shrub	-
90.	<i>Memecylon umbellatum</i>	Shrub	Kayaampoo
91.	<i>Mussaenda frondosa</i>	Shrub	Vellila
92.	<i>Nerium oleander</i>	Shrub	Arali
93.	<i>Pogostemon purpurascens</i>	Shrub	Thrijada
94.	<i>Polyalthia korintii</i>	Shrub	Karuvalli, Koranti
95.	<i>Premna serratifolia</i>	Shrub	Munja
96.	<i>Rauvolfia tetraphylla</i>	Shrub	Paambumkolli
97.	<i>Strobilanthes ciliatus</i>	Shrub	Cherukurunji
98.	<i>Urena lobata</i>	Shrub	Oorakam
99.	<i>Vitex negundo</i>	Shrub	Karinochhi
100.	<i>Acampe praemorsa</i>	Herb	Maravaazha
101.	<i>Achyranthes aspera</i>	Herb	Kadalaadi
102.	<i>Aerva lanata</i>	Herb	Cheroola
103.	<i>Amorphophallus paeoniifolius</i>	Herb	Kaattuchena
104.	<i>Andrographis paniculata</i>	Herb	Kiriyaattha
105.	<i>Biophytum reinwardtii</i>	Herb	Mukkutti
106.	<i>Centella asiatica</i>	Herb	Mutthil
107.	<i>Centotheca lappacea</i>	Herb	-
108.	<i>Colocasia esculenta</i>	Herb	Kaattuchembu
109.	<i>Corotalaria retusa</i>	Herb	Kilukilukki
110.	<i>Costus speciosus</i>	Herb	Channakkoova
111.	<i>Curculigo orchioides</i>	Herb	Nilappana
112.	<i>Curcuma amada</i>	Herb	MaagaInchi
113.	<i>Curcuma aurantiaca</i> (<i>Curcuma ecalcarata</i>)	Herb	-
114.	<i>Cynodon dactylon</i>	Herb	Karuka
115.	<i>Dendrobium aphyllum</i>	Herb	-
116.	<i>Desmodium gangeticum</i>	Herb	Orila
117.	<i>Emilia sonchifolia</i>	Herb	Muyalcheviyan
118.	<i>Eranthemum capense</i>	Herb	-
119.	<i>Hypolytrum memorum</i>	Herb	-
120.	<i>Laportea interrupta</i>	Herb	Choriyanam
121.	<i>Leucas stricta</i>	Herb	Thumba
122.	<i>Luisia tristis</i>	Herb	-
123.	<i>Mimosa pudica</i>	Herb	Thottavaadi
124.	<i>Molineria trichocarpa</i>	Herb	Nilappana
125.	<i>Naregamia alata</i>	Herb	Nilanaarakam
126.	<i>Ocimum tenuifloram</i>	Herb	Krishnathulasi

127.	<i>Peperomia pellucida</i>	Herb	Mashitthandu
128.	<i>Phyllanthus airy-shawii</i>	Herb	Keezhaarnelli
129.	<i>Piper longum</i>	Herb	Thippali
130.	<i>Rhynchosytilis retusa</i>	Herb	Maravaazha
131.	<i>Sida rhombifolia</i>	Herb	Kurunthotti
132.	<i>Tridax procumbens</i>	Herb	Kumminippachha
133.	<i>Vernonia cinerea</i>	Herb	Poovaamkurunthal
134.	<i>Xenostegia tridentate</i>	Herb	Thalaneeli, Prasarani
135.	<i>Zingiber zerumbet</i>	Herb	Malayinchi
136.	<i>Abrus precatorius</i>	Climber	Kunni
137.	<i>Abrus pulchellus</i>	Climber	Kattumuthira
138.	<i>Acacia caesia</i>	Climber	Incha
139.	<i>Anamirta cocculus</i>	Climber	Pollavalli
140.	<i>Artabotrys hexapetalus</i>	Climber	Manoranjini/Madanakaam eswari
141.	<i>Bauhinia phoenicea</i>	Climber	Vallimandaaram
142.	<i>Calycopteris floribunda</i>	Climber	Pullaanji
143.	<i>Cardiospermum halicacabum</i>	Climber	Uzhinja
144.	<i>Cassytha filiformis</i>	Climber	Moodillatthaali
145.	<i>Cissus discolour</i>	Climber	Njerinjaampuli
146.	<i>Cissus latifolia</i>	Climber	Chunnaambuvalli
147.	<i>Clitoria ternatea</i>	Climber	Shankupushpam
148.	<i>Combretum latifolium</i>	Climber	Pee-ula
149.	<i>Coscinium fenestratum</i>	Climber	Maramanjil
150.	<i>Cyclea peltata</i>	Climber	Paadakkizhangu
151.	<i>Derris scandens</i>	Climber	Ponnumvalli
152.	<i>Gloriosa superba</i>	Climber	Menthonni
153.	<i>Grewia heterotricha</i>	Climber	-
154.	<i>Grewia umbellifera</i>	Climber	Bhasmavalli
155.	<i>Hemidesmus indicus</i>	Climber	Nannaari
156.	<i>Jasminum angustifolium</i>	Climber	Kaattupichhakam
157.	<i>Jasminum malabaricum</i>	Climber	Kaattumulla
158.	<i>Jasminum multiflorum</i>	Climber	Kudamulla
159.	<i>Kametia caryophyllata</i>	Climber	Narumarathivu
160.	<i>Naravelia zeylanica</i>	Climber	Vaathakkodi
161.	<i>Pothos scandens</i>	Climber	Varivalli
162.	<i>Salacia chinensis</i>	Climber	Cherukoranti
163.	<i>Smilax zeylanica</i>	Climber	Kareelaanchi
164.	<i>Tiliacora acuminata</i>	Climber	Vallikkaanjiram
165.	<i>Tinospora cordifolia</i>	Climber	Chittamruthu
166.	<i>Wattakaka volubilis</i>	Climber	Vattakkakkakkodi
167.	<i>Ziziphus oenopia</i>	Climber	Cheruthudali
168.	<i>Ziziphus rugosa</i>	Climber	Vanthudali

3. Kizhur Shiva temple, Kozhikode (Kly-332)

No.	Scientific name	Habit	Common name
1.	<i>Adenanthera pavonina</i>	Tree	Manchadi
2.	<i>Aglaia elaeagnoidea</i>	Tree	Njazhal
3.	<i>Caryota urens</i>	Tree	Eerampana
4.	<i>Chukrasia tabularis</i>	Tree	Chuvannakil
5.	<i>Leucaena leucocephala</i>	Tree	Ipilippil
6.	<i>Mimusops elengi</i>	Tree	Elenji
7.	<i>Olea dioica</i>	Tree	Idala
8.	<i>Pajanelia longifolia</i>	Tree	Azhantha
9.	<i>Santalum album</i>	Tree	Chandanam
10.	<i>Sterculia guttata</i>	Tree	Kavalam
11.	<i>Strychnos nux-vomica</i>	Tree	Kanjiram
12.	<i>Vatica chinensis</i>	Tree	Adakkappayin
13.	<i>Bauhinia acuminata</i>	Shrub	Mandaram
14.	<i>Cycas circinalis</i>	Shrub	Eenth
15.	<i>Pedilanthus tithymaloides</i>	Shrub	Thathammedi
16.	<i>Dipteracanthus prostrates</i>	Herb	Velipadakkam
17.	<i>Piper longum</i>	Herb	Thippali
18.	<i>Zingiber nimmonii</i> (<i>Zingiber cernnum</i>)	Herb	Malayinchi
19.	<i>Cansjera rheedei</i>	Climber	
20.	<i>Cayratia pedata</i>	Climber	Chorivalli
21.	<i>Mussaenda frondosa</i>	Climber	Vellila
22.	<i>Pothos scandens</i>	Climber	Varivalli
23.	<i>Tiliacora acuminata</i>	Climber	Vallikanjiram
24.	<i>Uvaria narum</i>	Climber	Narumpanal
25.	<i>Ziziphus oenoplia</i>	Climber	Cheruthodali

4. Muchukunnu Kottayil Temple Kavu, Kozhikode (Kly-294)

No.	Scientific name	Habit	Common name
1.	<i>Adenanthera pavonina</i>	Tree	Manchadi
2.	<i>Aglaia elaeagnoidea</i> (<i>Aglaia roxburghiana</i>)	Tree	Njazhal
3.	<i>Briedelia retusa</i>	Tree	Mullenkaini
4.	<i>Caryota urens</i>	Tree	Eerampana
5.	<i>Cassia fistula</i>	Tree	Kanikonna
6.	<i>Celtis timorensis</i> (<i>Celtis cinnamomea</i>)	Tree	Bhuthiyunarthi Poochakkurumaram
7.	<i>Chrysophyllum cainito</i>	Tree	Star apple
8.	<i>Cinnamomum verum</i>	Tree	Karuva
9.	<i>Diospyros candolleana</i>	Tree	Karimaram
10.	<i>Ficus amplissima</i>	Tree	Chela
11.	<i>Ficus hispida</i>	Tree	Parakam
12.	<i>Ficus sp.</i>	Tree	
13.	<i>Gmelina arborea</i>	Tree	Kumizhu
14.	<i>Haldina cordifolia</i>	Tree	Manjakadambu
15.	<i>Holoptelia integrifolia</i>	Tree	Aavel
16.	<i>Hopea ponga</i> (<i>Hopea wightiana</i>)	Tree	Eeyakam
17.	<i>Hydnocarpus pentandra</i> (<i>Hydnocarpus wightiana</i>)	Tree	Marotti
18.	<i>Lannea coromandelica</i>	Tree	Karasu, Udhi
19.	<i>Litsea coriacea</i>	Tree	Maravettithaali
20.	<i>Macaranga peltata</i>	Tree	Vatta, Thodukanni
21.	<i>Mallotus philippensis</i>	Tree	Sindooram, Kurangumanjal
22.	<i>Mangifera indica</i>	Tree	Maavu
23.	<i>Mimusops elengi</i>	Tree	Elenji
24.	<i>Olea dioica</i>	Tree	Idala
25.	<i>Strychnos nux-vomica</i>	Tree	Kanjiram

26.	<i>Syzygium caryophyllum</i>	Tree	Cherunjaval
27.	<i>Terminalia paniculata</i>	Tree	Maruthu
28.	<i>Vatica chinensis</i>	Tree	Adakkapayin
29.	<i>Vitex altissima</i>	Tree	Myla
30.	<i>Zanthoxylum rhetsa</i>	Tree	Mullilam
31.	<i>Flueggea virosa</i>	Shrub	Perinklavu
32.	<i>Anitdesma acidum</i>	Shrub	Ariyaporiyan
33.	<i>Atalantia racemosa</i>	Shrub	Kaattunarakam
34.	<i>Benkara malabarica</i>	Shrub	Cholakara
35.	<i>Canthium angustifolium</i>	Shrub	Kattaramullu
36.	<i>Chassalia ophioxylodes</i>	Shrub	Vellakurinji
37.	<i>Chromolaena odorata</i> (<i>Eupatorium odoratum</i>)	Shrub	Communistpaccha
38.	<i>Cycas circinalis</i>	Shrub	Eenth
39.	<i>Glycosmis pentaphylla</i>	Shrub	Panal
40.	<i>Grewia nervosa</i>	Shrub	Cherikotta
41.	<i>Hibiscus hispidissimus</i>	Shrub	Panachan
42.	<i>Ixora malabarica</i>	Shrub	
43.	<i>Leea indica</i>	Shrub	Njekku, Njellu
44.	<i>Nothapodytes nimmoniana</i> (<i>Mappia foetida</i>)	Shrub	Peenari
45.	<i>Polyalthia korintii</i>	Shrub	Koranti pazham
46.	<i>Syzygium zeylanicum</i>	Shrub	Poochapazham
47.	<i>Tabernaemontana heyneana</i>	Shrub	Koonampala
48.	<i>Triumfetta rhomboidea</i>	Shrub	Ottukai
49.	<i>Acampe paremorsa</i>	Herb	Maravazha
50.	<i>Achyranthes aspera</i>	Herb	Kadaladi
51.	<i>Canscora diffusa</i>	Herb	Jeerakapullu
52.	<i>Cyathula prostrata</i>	Herb	Cherukadaladi
53.	<i>Cymbidium aloifolium</i>	Herb	Maravazha
54.	<i>Desmodium triquetrum</i>	Herb	Ammayivettilla
55.	<i>Naregamia alata</i>	Herb	Nilanarakam
56.	<i>Oplismenus compositus</i>	Herb	
57.	<i>Zingiber nimmonii</i> (<i>Zingiber cernuum</i>)	Herb	Malayinchi

58.	<i>Abrus pulchellus</i>	Climber	Kattumuthira
59.	<i>Acacia caesia</i>	Climber	Incha
60.	<i>Alangium salvifolium</i> ssp. <i>hexapetalum</i>	Climber	Valliankolam
61.	<i>Briedelia stipularis</i> (<i>Briedelia scandens</i>)	Climber	Cherukapanachi Kanjikottam
62.	<i>Calycopteris floribunda</i>	Climber	Pullani
63.	<i>Canavalia</i> sp.	Climber	
64.	<i>Cissus heyneana</i>	Climber	
65.	<i>Cissus latifolia</i>	Climber	Chunnambuvalli
66.	<i>Dioscorea bulbifera</i>	Climber	Kattukatchil
67.	<i>Dioscorea wallichii</i>	Climber	
68.	<i>Diploclisia glaucescens</i>	Climber	Vattavalli
69.	<i>Gloriosa superba</i>	Climber	Menthonni
70.	<i>Ichnocarpus frutescens</i>	Climber	Parvalli
71.	<i>Ipomoea mauritiana</i> (<i>Ipomoea palmata</i>)	Climber	Palmuthakku
72.	<i>Jasminum coarctatum</i> (<i>Jasminum rottlerianum</i>)	Climber	Kattumulla
73.	<i>Jasminum malabaricum</i>	Climber	Kadambavalli
74.	<i>Marsdenia</i> sp.	Climber	
75.	<i>Mikania micrantha</i>	Climber	Dhriashtrapaccha, Vayara

54.	<i>Piper hymenophyllum</i>	Climber	Kattukurumulagu
55.	<i>Pothos scandens</i>	Climber	Paruvakkodi, Varivally
56.	<i>Smilax zeylanica</i>	Climber	Kareelanchi
57.	<i>Strychnos minor</i>	Climber	Vallikanjiram
58.	<i>Tetrastigma leucostaphylum</i>	Climber	
59.	<i>Uvaria narum</i>	Climber	Narumpanal
60.	<i>Fagraea ceilanica</i> (<i>Fagraea obovata</i>)	Shrub	Modakam

Note: *Vatica chinensis* is the most common and dominant among large trees. Among the lower storey trees, *Scleropyrum pentandrum* is very common.

13. Shree Kattil Kariyathan Kavu, Kannadichal, (Kkd-412)

No.	Scientific Name	Habit	Common name
1.	<i>Adenantha pavonina</i>	Tree	Manchadi
2.	<i>Briedelia retusa</i>	Tree	Mullenkaini
3.	<i>Carallia brachiata</i>	Tree	Vallabham, Varangu
4.	<i>Caryota urens</i>	Tree	Eerampana
5.	<i>Chrysophyllum cainito</i>	Tree	Star apple
6.	<i>Ficus religiosa</i>	Tree	Arayal
7.	<i>Holigarna arnottiana</i>	Tree	Cheru, Charu
8.	<i>Hopea ponga</i> (<i>Hopea wightiana</i>)	Tree	Eeyakam
9.	<i>Mallotus philippensis</i>	Tree	Sindhooram, Kurangumanjal
10.	<i>Mangifera indica</i>	Tree	Mavu
11.	<i>Mimusops elengi</i>	Tree	Elengi
12.	<i>Olea dioica</i>	Tree	Edala
13.	<i>Strychnos nux-vomica</i>	Tree	Kanjiram
14.	<i>Syzygium caryophyllatum</i>	Tree	Cherunjaaval
15.	<i>Vateria indica</i>	Tree	Vellappine
16.	<i>Vatica chinensis</i>	Tree	Adakkappine
17.	<i>Vitex altissima</i>	Tree	Myla
18.	<i>Antidesma acidum</i>	Shrub	Ariyaporiyan
19.	<i>Breynia retusa</i>	Shrub	Mullenkaini
20.	<i>Breynia vitis-idaea</i>	Shrub	Pavalapoola
21.	<i>Canthium angustifolium</i>	Shrub	Kattaramullu
22.	<i>Chassalia ophioxyloides</i>	Shrub	Vellakurinji

CHAPTER. VI

Plant Distribution –Frequency Analysis.

Among the 1231 sacred groves (SGs) of the district, one time enumeration was carried out in 27 SGs based on the extent of area, vegetation type and location in the four taluks viz. Kozhikode, Quilandy, Vadakara and Thamarassery. For the analysis of the frequency of distribution and occurrence, perennial species like trees, shrubs and climbers alone were taken because enumeration was carried out only once in the Sacred groves. Among the 372 species enumerated, 143 are trees, 121 climbers and 108 shrubs. With regards to the frequency of occurrence, *Strychnos nux-vomica* is the most widely occurring species. It is occurring in all the 27 SGs; followed by *Adenathera pavonina* and *Pothos scandens* in 25 SGs; *Caryota urens*, *Chassalia ophioxyloides* and *Mimusops elengi* in 24 SGs; *Cissus latifolia* in 23 SGs and *Sterculia guttata* in 20 SGs. As many as 90 species are occurring in one SG; 56 species in two SGs; 40 species in three SGs and 35 species in four SGs. The frequency of occurrence of species in different sacred groves is provided in table 1-24 and figure1.

Analysis of species distribution shows that as many as 19 species enumerated from Vallikkattu Kavu have not been recorded from other SGs. Poyilkavu has 6 species unique to it; Peralam Kavu has 9; Pinnanath Kavu and Parokavu have 6 each and Peralam Kavu has 9 species. With regards to nativity of species which are unique to the sacred groves, out of the 19 species in Vallikkattu Kavu, 15 are indigeno((us and 2 exotics. All the 6 unique species in Poyil Kavu and Pinnanathu Kavu are indigenous. In Parokavu, out of the 6 unique species, *Acaia auriculiformis* is exotic. Among the 90 unique species in the sacred groves, 69 are indigenous and 19 exotics. The tables carry abreviaions of sacred groves.

(Note- Refer page no.122 for abbreviations on Sacred Groves).

Table 1. Species occurring only in one sacred grove

Species name	Name of sacred groves
Ancistrocladus heyneanus	VK
Anodendron paniculatum	VK
Bauhinia scandens	VK
Bonamia semidigyna	VK
Adhatoda zeylanica	VK
Cereus pterogonus	VK
Ixora brachiata	VK
Ixora polyantha	VK
Pavetta tomentosa	VK
Archidendron bigeminum	VK
Diospyros sp.	VK
Gomphandra coriacea	VK
Gymnacranthera farquhariana	VK
Madhuca neriifolia	VK
Mastixia arborea ssp. mezziana	VK
Myristica fatua var. magnifica	VK
Prunus ceylanica	VK
Pterospermum diversifolium	VK
Spathodea campanulata	VK
Derris sp.	PY
Embelia tsjeriam-cottam	PY
Ficus tsjahela	PY
Ipomoea campanulata	PY
Morinda umbellata	PY
Piper hymenophyllum	PY
Dioscorea alata	PN
Diospyros montana	PN
Ficus tinctoria ssp. parasitica	PN
Ipomoea pes-tigridis	PN
Litsea glutinosa	PN

Bambusa vulgaris	VL
Piper longum	KK
Piper sp.	KK
Acacia auriculiformis	PR
Ficus arnottiana	PR
Morinda reticulata	PR
Phyllanthus emblica	PR
Phyllanthus reticulates	PR
Solena amplexicaulis	PR
Delonix regia	CH
Ficus racemosa	CH
Litsea ghatica	CH
Naringi crenulata	CH
Sauropus androgynus	CH
Spatholobus parviflorus	CH
Vernonia elliptica	CH
Capparis mooniana	TM
Coccinia grandis	TM
Croton oblongifolius	NK
Allophylus cobbe	PM
Leea guineensis	PM
Ipomoea triloba	AZ
Mimosa invisa	AZ
Murraya koenigii	AZ
Nyctanthes arbortristis	AZ
Argyrea populifolia	KV
Ixora lanceolaria	KV
Atalantia racemosa	MK
Canavalia sp.	MK
Celtis timorensis	MK
Haldina cordifolia	MK
Hibiscus surattensis	GK
Pereskia belo	GK

<i>Chukrasia tabularis</i>	KS
<i>Leucaena leucocephala</i>	KS
<i>Pajanelia longifolia</i>	KS
<i>Pedilanthus tithymaloides</i>	KS
<i>Ficus talbotii</i>	TH
<i>Dysoxylum malabaricum</i>	TC
<i>Lophopetalum wightianum</i>	TC
<i>Plumeria obtusa</i>	TC
<i>Lepisanthes tetraphylla</i>	KM
<i>Meineckia parvifolia</i>	KM
<i>Strobilanthes ciliatus</i>	KM
<i>Acacia sinuata</i>	TS
<i>Albizia lebbeck</i>	TS
<i>Diplocyclos palmatus</i>	TS
<i>Moringa pterygosperma</i>	TS
<i>Ficus microcarpa</i>	TV
<i>Bauhinia purpurea</i>	TP
<i>Plumbago zeylanica</i>	TP
<i>Allamanda cathartica</i>	PL
<i>Artemisia nilagarica</i>	PL
<i>Blepharistemma serratum</i>	PL
<i>Calopogonium mucunoides</i>	PL
<i>Hyptis suaveolens</i>	PL
<i>Ipomoea carnea</i> ssp. <i>fistulosa</i>	PL
<i>Justicia beddomei</i>	PL
<i>Scaevola sericea</i>	PL
<i>Thevetia peruviana</i>	PL

Table 2. Species occurring in 2 sacred groves.

Abutilon indicum	TV,TP
Acronychia pedunculata	VK,PY
Alstonia venenata	TS, PL
Ampelocissus indica	PM, TH
Annona reticulata	PN, TM
Antidesma bunius	KM, PL
Antidesma ghaesembilla	VK, PL
Aporosa acuminata	KM, TV
Aristolochia indica	TK, TV
Artabotrys hexapetalus	TC, KM
Baliospermum montanum	TS, PL
Bauhinia phoenicea	VK, KM
Breynia retusa	SK, TH
Caesalpinia pulcherrima	TV, PL
Callicarpa tomentosa	VK, TV
Calophyllum inophyllum	TV, TP
Canarium strictum	TC,TS
Careya arborea	VK,TS
Cassia siamea	KK, GK
Cipadessa baccifera	KM, TP
Cissus sp.	PR, CH
Cordia wallichii	TS, PL
Cosmostigma racemosum	CH, VG
Diploclisia glaucescens	VL, TS
Erythrina variegata	PM,TV
Falconeria insignis	VK, PR
Ficus sp.	PY, TS
Glycosmis mauritiana	PR, CH
Gomphandra tetrandra	TC, TV
Helicteres isora	VK, CH
Holarrhena pubescens	VK, TS

Holoptelea integrifolia	MK, TH
Hopea parviflora	TC, KM
Ipomoea hederifolia	TC, CB
Ixora finlaysoniana	KM, TV
Ixora javanica	TC, PL
Justicia adhatoda	PM, TC
Lantana camara	TP, PL
Marsdenia tenacissima	PM, TS
Myristica malabarica	VK, PY
Nothopegia travancorica	VK, PY
Pavetta sp.	PY, KV
Persicaria chinensis	TV, TP
Pseuderanthemum malabaricum	VK, PL
Pterocarpus marsupium	GK, TS
Quisqualis indica	TC, PL
Rubia cordifolia	TV, PL
Sapindus trifoliatus	TM, NK
Sarcostigma kleinii	PM, AZ
Swietenia macrophylla	TP, PL
Terminalia cuneata	TS, TV
Toxocarpus kleinii	PN, TH
Tylophora indica	VK, TP
Wrightia tinctoria	KM, S
Xylia xylocarpa	PR, KM
Zanonia indica	PN, AZ

Table 3. Species occurring in 3 sacred groves.

Ampelocissus latifolia	TC,CB,TP
Antidesma montanum	TC,TS,TP
Areca catechu	TC,TS,PL
Argyreia nervosa	TC,CB,PL
Argyreia sp.	VL,CH,VG
Asparagus racemosus	VK,PY,NK
Barleria prionitis	CB,TP,PL
Butea monosperma	TS,CB,TP
Cardiospermum halicacabum	TC,KM,TS
Cissampelos pareira	TS,TP,PL
Clerodendrum paniculatum	TC,TS,CB
Combretum latifolium	VK,KV,KM
Connarus monocarpus	- VK,TS,PL
Corypha umbraculifera	VK,TC,PL
Coscinium fenestratu-	TC,KM,TP
Cryptolepis buchananii	VK,TS,TP
Cynometra travancorica	TC,KM,TV
Dendrocalamus strictus	KM,TS,TV
Desmodium triangulare	TC,CB,TV
Dioscorea sp.	VK,PN,VL
Diospyros paniculata	TC,KM,CB
Dipterocarpus indicus	TC,KM,TV
Elaeocarpus tuberculatus	KM,TS,PL
Entada rheedei	CB,TV,TP
Ficus amplissima	PY,VL,KK
Flacourtia montana	CH,TM,PM
Gmelina arborea	MK,TS,CB
Gymnema sylvestre	VK,TC,PL
Ipomoea mauritiana	PM,AZ,MK
Kamettia caryophyllata	VK,KM,PL
Leptonychia caudata	TC,TS,CB
Magnolia champaca	VK,TS,CB
Mikania micrantha	MK,TC,CB

Salacia chinensis	TC,KM,TS
Syzygium zeylanicum	SK,AZ,MK
Terminalia catappa	VK,KM,PL
Terminalia chebula	KM,TS,CB
Tetrastigma leucostaphylum	VK,PY,AZ
Thespesia populnea	TS,TV,PL
Woodfordia fruticosa	TV,TP,PL

Table 4. Species occurring in 4 sacred groves.

Acalypha hispida	TC,CB,TV,TP
Antiaris toxicaria	TM,NK,TC,KM
Artocarpus hirsutus	PY,PN,VL,KM
Cajanus scarabaeoides	VK,PR,TS,TP
Canthium coromandelicum	KM,TS,CB,TP
Cissus heyneana	PM,AZ,MK,GK
Derris trifoliata	TC,CB,TV,TP
Dichapetalum gelonioides	VK,PY,TV,TP
Ecbolium ligustrinum	TC,KM,TV,TP
Ecbolium viride	TS,CB,TV,PL
Flueggea virosa	VK,PM,MK,TK
Gliricidia sepium	TK,KM,TP,PL
Glochidion zeylanicum	TC,KM,CB,TP
Grewia heterotricha	KM,CB,TV,TP
Grewia tiliifolia	KM,TS,TV,PL
Lagerstroemia microcarpa	CH,TH,KM,CB
Lygodium scandens	VK,PY,PM,AZ
Maesa indica	KM,TS,TV,PL
Melastoma malabathricum	SK,TH,TV,TP
Memecylon randerianum	VK,PR,TC,KM
Merremia umbellata	VK,PN,PM,AZ
Merremia vitifolia	VK,TC,CB,TP

Murraya paniculata	VK,PM,KM,TS
Osbeckia virgata	TC,CB,TV,TP
Pavetta indica	PR,GK,TV,PL
Pogostemon purpurascens	TC,KM,CB,TP
Pseudarthria viscida	CB,TV,TP,PL
Scleropyrum pentandrum	VK,PY,TK,KM
Stachytarpheta jamaicensis	TS,TV,TP,PL
Stereospermum colais	KM,TS,TV,PL
Strychnos minor	VK,PY,PR,KV
Tamarindus indica	TC,CB,TV,TP
Terminalia bellirica	GK,KM,TV,PL
Terminalia paniculata	MK,TS,TV,PL
Xanthophyllum arnottianum	VK,TC,KM,PL

Table 5. Species occurring in 5 sacred groves.

Bauhinia acuminata	VK,KS,TC,TV,PL
Benkara malabarica	VK,MK,TK,GK,TH
Breynia vitis-idaea	VK,PM,GK,TH,TP
Calotropis gigantea	TC,TS,CB,TP,PL
Cayratia pedata	VK,PY,TK,GK,KS
Cissus repens	VK,TC,TS,TP,PL
Cyclea peltata	VK,PR,CH,TC,KM
Datura metel	TC,TS,CB,TP,PL
Diospyros candolleana	PY,MK,TH,TC,TS
Duranta erecta	TC,KM,CB,TP,PL
Fagraea ceilanica	VK,PY,PR,TC,KM
Ficus benghalensis	PN,AZ,GK,KM,TV
Ipomoea obscura	TC,CB,TV,TP,PL
Jasminum multiflorum	TC,KM,TS,CB,PL
Lannea coromandelica	PN,PM,AZ,KV,MK
Mesua ferrea	AZ,KV,TC,CB,TV

Nerium oleander	TC,KM,TS,CB,TV
Persea macrantha	TC,TS,CB,TV,TP
Piper nigrum	VK,PM,TC,TV,TP
Rauvolfia serpentina	TC,TS,CB,TP,PL
Vitex negundo	TC,KM,TS,CB,TV
Wattakaka volubilis	VK,KM,TS,TP,PL
Wrightia arborea	TC,TS,CB,TP,PL

Table 6. Species occurring in 6 sacred groves.

Acacia torta	VK,PY,KK,CH,PM,AZ
Ailanthus triphysa	VL,VG,GK,KM,TV,TP
Alangium salvifolium	TC,KM,TS,CB,TP,PL
Albizia saman	PN,VL,KK,CH,NK,TK
Bixa orellana	TC,TS,CB,TV,TP,PL
Bombax ceiba	VK,PR,TH,TS,TV,TP
Catunaregam spinosa	TC,KM,TS,CB,TP,PL
Celastrus paniculatus	VK,PM,TH,TS,CB,PL
Chonemorpha fragrans	VK,PR,CH,TC,TS,TP
Cinnamomum malabattrum	VK,PN,PR,CH,TC,TP
Cycas circinalis	VK,CH,PM,AZ,MK,KS
Dioscorea wallichii	PM,AZ,KV,MK,GK,TH
Diospyros peregrina	PM,TC,KM,TS,CB,TV
Erycibe paniculata	VK,PY,PR,AZ,KV,TH
Ficus drupacea. var. pubescens	PY,KK,PR,PM,AZ,GK
Gnetum edule	VK,PY,VL,PR,MK,TH
Hemidesmus indicus	VK,TC,KM,TS,CB,TV
Holostemma ada-kodien	TC,TS,CB,TV,TP,PL
Mucuna pruriens	VK,TC,TS,CB,TV,TP
Premna serratifolia	PR,CH,SK,KM,TP,PL
Rourea minor	VK,PR,TM,AZ,GK,TH
Streblus asper	VK,VL,KK,TM,VG,KV
Ziziphus rugosa	VK,TC,KM,TS,TP,PL

Table 7. Species occurring in 7 sacred groves.

Aegle marmelos	VK, KK, KM, TS, TV, TP, PL
Allophylus serratus	VK, PR, CH, KM, TS, CB, TV
Aphanamixis polystachya	VK, VL, PM, TK, TC, KM, TP
Bambusa bambos	VK, CH, PM, AZ, TC, TS, PL
Briedelia retusa	VK, TM, VG, SK, PM, MK, TH
Canthium rheedei	VK, PY, GK, TC, KM, TP, PL
Centrosema molle	PM, AZ, KV, TH, TS, TP, PL
Clitoria ternatea	TC, KM, TS, CB, TV, TP, PL
Dendrophthoe falcata	TC, KM, TS, CB, TV, TP, PL
Dioscorea pentaphylla	VK, PY, PR, CH, TM, NK, SK
Ficus hispida	PY, CH, PM, MK, TC, TS, PL
Grewia umbellifera	VK, TC, KM, TS, CB, TP, PL
Hibiscus rosa-sinensis	TC, KM, TS, CB, TV, TP, PL
Justicia gendarussa	TC, KM, TS, CB, TV, TP, PL
Litsea coriacea	VK, PM, AZ, KV, MK, KM, TS
Oroxylum indicum	TC, KM, TS, CB, TV, TP, PL
Salacia fruticosa	VK, AZ, KV, TC, TS, TV, TP
Tinospora cordifolia	TC, KM, TS, CB, TV, TP, PL
Urena lobata	TC, KM, TS, CB, TV, TP, PL

Table 8. Species occurring in 8 sacred groves.

Cassytha filiformis	SK, TC, KM, TS, CB, TV, TP, PL
Cissus discolor	VK, TC, KM, TS, CB, TV, TP, PL
Clerodendrum serratum	PR, SK, KM, TS, CB, TV, TP, PL
Cocos nucifera	VK, PM, TC, KM, TS, CB, TV, PL
Ficus exasperata	KK, CH, TM, VG, TS, CB, TP, PL
Flacourtia indica	SK, TC, KM, TS, CB, TV, TP, PL
Hugonia mystax	VK, PN, PR, TK, GK, TV, TP, PL
Ixora malabarica	VK, PY, PR, CH, PM, AZ, MK, PL
Jasminum coarctatum	VL, CH, TM, NK, VG, PM, AZ, MK
Triumfetta rhomboidea	AZ, MK, GK, TC, TS, CB, TV, TP
Vateria indica	VK, SK, KV, GK, TC, CB, TP, PL
Vitex altissima	VK, PR, CH, SK, MK, TH, TC, KM

Table 9. Species occurring in 9 sacred groves.

Abrus precatorius	VK,PN,TC,KM,TS,CB,TV,TP,PL
Acacia caesia	VK,MK,TC,KM,TS,CB,TV,TP,PL
Aporosa cardiosperma	VK,PR,CH,TH,KM,CB,TV,TP,PL
Derris scandens	VK,PN,TC,KM,TS,CB,TV,TP,PL
Gomphia serrata	VK,PR,AZ,TC,KM,TS,CB,TP,PL
Jasminum angustifolium	PM,TH,TC,KM,TS,CB,TV,TP,PL
Macaranga peltata	VK,PY,KK,PR,CH,KV,MK,TH,PL
Naravelia zeylanica	VK,CH,TC,KM,TS,CB,TV,TP-,PL
Polyalthia korintii	VK,PR,VG,MK,TK,GK,KM,CB,PL
Rauvolfia tetraphylla	KK,CH,TC,KM,TS,CB,TV,TP,PL
Saraca asoca	PY,CH,TC,KM,TS,CB,TV,TP,PL
Syzygium cumini	VK,PY,KK,TM,PM,AZ,TC,KM,TP
Trema orientalis	PN,KK,TM,PM,AZ,TS,CB,TP,PL

Table 10. Species occurring in 10 sacred groves.

Alangium salvifolium spp. hexapetalum	VL,KK,PR,CH,TM,NK,VG,MK,TC,PL
Briedelia stipularis	PN,KK,PR,CH,MK,TC,,KM,TS,TP,PL
Memecylon umbellatum	VK,PR,SK,TH,TC,KM,TS,CB,TV,TP
Anacardium occidentale	VK,PM,GK,TC,KM,TS,CB,TV,TP,PL
Cinnamomum verum	PM,AZ,MK,TC,KM,TS,CB,TV,TP,PL

Table 11. Species occurring in 11 sacred groves

Artocarpus heterophyllus	VK,CH,TM,PM,TC,KM,TS,CB,TV,TP,PL
Chromolaena odorata	PM,AZ,KV,MK,GK,TC,KM,CB,TV,TP,PL
Dalbergia horrida	VK,PY,PN,VL,PR,CH,NK,KV,TC,TS,TP
Gloriosa superba	PN,TM,SK,PM,AZ,MK,TH,KM,TS,CB,PL
Hydnocarpus pentandra	VK,PY,PR,CH,TM,NK,PM,AZ,MK,CB,TV
Nothapodytes nimmoniana	VK,PN,CH,TM,NK,PM,AZ,MK,TK,TS,PL
Plumeria rubra	PN,KK,TM,GK,TC,KM,TS,CB,TV,TP,PL
Pongamia pinnata	VK,PN,KK,CH,TM,TK,GK,KM,TV,TP,PL
Schleichera oleosa	PR,CH,PM,TH,TC,KM,TS,CB,TV,TP,PL
Trichosanthes tricuspidata	PN,VL,KK,CH,TM,TC,TS,CB,TV,TP,PL

Table 12. Species occurring in 12 sacred groves

Anamirta cocculus	VK,PY,VL,CH,VG,AZ,KM,TS,CB,TV,TP,PL
Clerodendrum infortunatum	VK,PN,PR,CH,TM,NK,TC,KM,TS,CB,TV,PL
Santalum album	VK,PR,CH,GK,KS,TC,KM,TS,CB,TV,TP,PL
Syzygium caryophyllatum	VK,PR,SK,AZ,MK,TC,KM,TS,CB,TV,TP,PL

Table 13. Species occurring in 13 sacred groves

Abrus pulchellus	PY,VL,PM,AZ,KV,MK,GK,TH,TC,KM,TS,CB,PL
Jasminum malabaricum	VK,SK,PM,AZ,KV,MK,TK,TH,TC,KM,CB,TV,TP
Tinospora sinensis	VK,PN,CH,TM,NK,SK,TK,GK,TH,TC,KM,TP,PL
Glycosmis pentaphylla	VK,TM,VG,PM,AZ,MK,TC,KM,TS,CB,TV,TP,PL

The analysis with respect to endemism shows that, out of the 372 species, 35 are Western Ghats endemics. Endemism among trees are relatively high with 19 species. Among the 121 species of climbers only 5 are endemics and out of the 108 shrubs 11 endemics. As many as 44 exotics were recorded from the sacred groves. Invasive species such as *Mikania micrantha*, *Mimosa invisa* and *Chromolaena*

odorata have established in some of the sacred groves where the vegetation is degraded. Exotic garden plants such as *Ixora javanica*, *Plumeria obtusa*, *Plumeria rubra*, *Nerium oleander*, *Allamanda cathartica*, *Caesalpinia pulcherrima*, *Bixa orellana* etc were planted in some of the sacred groves. Among the 10 dominant sacred groves, tree diversity is highest in Karimalakavu with 61 species. Shrub diversity is high in Peralamkavu with 54 species and climber diversity high in Vallikkattukavu with 54 species.

Table 26. Taluk-wise occurrence of species of trees, shrubs and climbers

Taluk	Trees	Shrubs	Climbers	Total
Kozhikkode	129	96	104	329
Koilandy	85	57	71	213
Vadakara	48	32	45	125
Thamarassery	53	44	48	145

Among the taluks, Kozhikode has the highest species diversity.

CHAPTER VII ECOLOGICAL STATUS.

Sacred groves with their richness in biodiversity are of immense ecological significance. The vegetation as well as the biological setup in a sacred grove is normally fully protected from human interference through customary taboos and sanctions with cultural and ecological implications. In such a typical condition there can be immense activity among and between all living organisms providing plenty of resources for research on some of the aspects not seen studied hitherto. In this chapter with the limited scope to undertake a study on this vast subject, the observations made with the basic principles relating to ecological status have been presented. This is confined to vegetation, soil conditions, faunal significance and water conservation.

. Keystone species

Apart from direct benefits of biodiversity conservation, there are indirect benefits which flow from sacred groves through ecosystem functions. Some species, though present in small numbers, play very important role by their unique abilities such as nitrogen fixation and attracting many birds, animals etc. and help maintaining life forms in plenty. They are known as keystone species. These species have disproportionate large effect on other species in a community. Law (2002) tried to identify keystone species in two SGs based on following parameters.

- i. Importance of value index (ivi)
- ii - Position of the canopy,
- iii - Position of growth form,
- iv. Association with other species (epiphytic growth), mobile links (pollinators, dispersers)
- v. Capacity to supply food resources for faunal diversity,
- vi. Succession status-light demanding/shade tolerant,
- vii- Biomass and nutrient allocation pattern to shoot and root.,
- viii. Shoot / root ratio of seedlings.
- ix. Nutrient input to the system.

Once such species are removed from an ecosystem it may create dramatic changes in the rest of the community. Much studies have not been made on this aspect in respect of the SGs in Kerala. In Tamil Nadu *Ficus religiosa* and *F. benghalensis* - known as strangler figs, are considered to be Keystone species. These species have aggressive growth habit ensuring their regeneration and survival. They bear pulpy small fruits during dry summer when most of the other species do not.

Hence they attract frugivorous birds, a few mammals and reptiles and several species of insects. Many pollinators and seed dispersers are attracted to promote regeneration in the plant community. In many of the SGs Ficus species are present. Another attraction is that the different species of Ficus bear fruits in different seasons also. The strong winding roots of Ficus prevent soil erosion. It is because of these influences on other community these species are called keystone species. There can be more such species if studies are taken up in this direction.

Taking into consideration the essential qualities of keystone species the following species seen in these SGs are suggested for consideration and study.

- i. *Vateria indica*-(Dipterocarpaceae). This is a shade bearer having no problems in regeneration. This has profuse seeding habit. It occupies the canopy in a spreading manner and flowers during January-March.
- ii. *Caryota urens* (Palmae)-This is almost very common in the SGs. Its regeneration status is excellent. Most of the time it is in flowers or fruits. It is attracted by many birds and mammals. Bats always finish it in course of time. It provides toddy attracting many species.
- iii. *Aglaia elaeagnoida* (Meliaceae) .This can tolerate shade. The fruits are edible and have medicinal value. Seeds are dispersed by animals and attract birds.
- iv. *Holygarna arnottiana*-(Anacardiaceae). This is shade tolerant. Flowering during Jan-Feb. Its fruit is liked by porcupine. This also is a common tree in SGs. Its roots bind soil on stream banks preventing erosion as can be seen in *picture 12, Plate V*.
- v. *Aphanamixis polystachya*(Meliaceae)-This tree called *chemmaram* is liked by birds and animals and produces plenty of fruits.. It is one among the large trees where ever found and grows in almost all types of soils. Bark has medicinal value and used in treatment of animals.
- vi. *Vatica chinensis* (Dipterocarpaceae) –This is one among the prominent trees and bats prefer this for roosting. It also produces plenty of fruits and is included in IUCN Red List.

- vii. Similarly there are some shrubs like *Glycosmis pentaphylla*, *Chassalia ophioxyloides*, *Canthium* species which do play an important role in sustaining vegetation in the sacred groves.
- viii. *Alangium salvifolium*, the climber is very important as medicinal plant. Its fruits are liked by all kinds of animals and birds. Similar other climbers *Gymnema sylvestre*, *Hemidiscus indicus* etc also are species to be studied in this direction to highlight their role in the sustenance of sacred groves.

Natural Regeneration

The species composition of trees in sacred groves consists of light demanders, shade bearers and shade tolerants. Seedlings of species, for which securing light condition is less pronounced, may come up or compete with the seedlings of top canopy species. As the top canopy trees of varying growth requirements survive well, their regeneration under less favourable conditions particularly when the light condition is restricted, is a matter of study. Regeneration of shade bearing and shade tolerant species do come up, but it persists for long periods in whipple form till favourable light conditions set in. These seedlings survive if soil conditions are favourable and root competition is less provided they could build up reasonable level of root stock. It is by keeping these basic principles in mind the flora of the sacred groves have been examined.

Natural regeneration in humid tropical forest is highly complex and least understood. In a closed canopy, it depends on gaps created by natural agencies like wind, old age of trees and so on. Stool shots generally arise from short lived adventitious buds formed between the wood and bark of the stump.

Natural regeneration depends on the following-

Seed production, age of the tree, predation of seeds, failure of ovule development, interval of seed production, dispersal and germination-In the case of orthodox seeds -viability is long. As regards recalcitrant seeds, they are killed if moisture content is below a certain value. Large seeds do not germinate unless they are buried beneath the litter or mineral soil as seen in the case of *Diospyros perigrina*. It is a shade bearer. Its seeds are disbursed by bats and monkeys. If exposed to sun for longer period it seldom germinate and grow. This is confined to wet locations of coastal belt. Natural regeneration of shrubs and climbers is not a matter of concern since they multiply even under reduced light conditions. As most of the SGs are

comparatively small in extent unlike large stretches of forest growth, light penetration from lateral side is also possible which mitigate adverse condition for the growth of light demanders. Natural regeneration is generally good in the case of Anjily (*Artocarpus hirsutus*), Manchady (*Adanenthera pavonina*), Charu (*Holigarna arnotiana*), Uletty (*Caryotta urens*), Marotty (*Hydnocarpus pentandra*), etc. which are common in almost all the sacred groves. Regeneration in the form of root suckers is also noticed in the case of *Strychnos nux-vomica*. Natural regeneration is good in respect of *Aglaia elaeagnoidea* where the soil is high acidic and in respect of *Aphanamixis polystachya*, *Vatica chinensis* and *Olea dioica* it is good when the soil is less acidic.

Saraca asoca (Ashokam) is a shade loving tree and is considered to be one of the species in Sacred Groves. Besides regeneration from seeds it produces coppice shoots. This is seen more common than in southern regions. But such profuse regeneration is not seen in SGs. It is understood from literature that there are chances for pods of *Saraca* getting infected by pests before they become ripe to disperse mature seeds. Some of the species though shade tolerant when young need overhead light to grow well after they reach sapling stage. *Artocarpus hirsute* & *Alstonia scholaris* behave this manner. *Phyllanthus emblica* is rarely seen in the sacred groves. Natural regeneration is very poor due to low viability of seeds and sensitivity of seedlings to shade.

Again natural regeneration of some species which are basically deciduous in nature is noticed in the sacred groves. *Pongamia pinnata* is drought hardy and sensitive to shade. The regeneration of this plant along with mature ones is seen on the boundaries of some of the sacred groves. Sandal wood is generally a light demander though it can tolerate shade to some extent. But we have noticed more sandal saplings in many along fringes. The fact that these patches are protected from fire is also contributing to improved regeneration status. But the role of invasive species, mainly climbers, is a matter that calls for deep thinking.

Soil Condition

In Sacred Groves, periodicity of litter fall varies according to seasons. It starts by winter and goes on till March. Fine root production starts in Feb-March and reaches its peak during rains. Studies indicate that litter is the main store house of nitrogen than fine roots and microbial biomass. Litter decay starts by first few showers and reaches its peak in the rainy season. It releases nutrient fast during rainy season when the up take by plants is very high. Litter and fine roots normally add phosphorus to soil, but relatively less. The input of nitrogen is very much higher than

that of other nutrients. Mineralization (by which humus is converted into inorganic nutrients) during wet weather and immobilization during the dry season is common as regards nitrogen is concerned. Release of nitrogen from decomposing litter is double that from fine roots. When nitrogen is released in plenty, apparently gall develops and is visible on leaf surface. Gall is an abnormal swelling of plant tissue by parasitic organisms. Parasites stimulate production of galls by secreting chemical irritants on the plant tissue.

SOIL TEST

Soil samples were taken from five sacred groves at different locations and at five sites outside the SGs but close to them for comparison. The result of soil test shows that in most of the cases availability of organic carbon is generally medium even though the samples were taken after the areas received very good showers. The high concentration of fine roots in surface layer of soil facilitates rapid uptake of nutrients released from decomposing litter.

Organic Carbon - (OC) is the most important constituent of the soil which influence the plant growth as a source of energy and a trigger for nutrient availability through mineralization. An increase in OC leads to greater biological diversity both in flora and soil organisms. **Phosphorus** is the main supplier of microbes and not the litter or fine roots. It also helps growth of roots. When acidity is high phosphorous is less active. **But in these areas acidity is comparatively low.** **Potassium** is more in clayey soil but it is not in the form for absorption by plants. It is helpful in protein synthesis, opening and closing of stomata and in photosynthesis. Potassium deficiency is common in sandy soils. When the level of potassium and phosphorus is deficient to match the available nitrogen besides general growth, fruiting and flowering of plants retard. These are the basic concepts based on which the effect of soil test result on the vegetation of sacred groves is examined.

The number of soil samples taken is not sufficient enough to make authentic conclusions on the occurrence of various species. Moreover, such a detailed study is beyond the purview of this report. One of the main observations made is that in alkaline soils the species diversity is very low. Again, in respect of SGs having alkaline soil, the outside sites have acidic soil

Soil test results

Sl.no	Site Id	pH	EC	Organic carbon	Pottassium	Phosforus
1	Kkd-578	Medium acidic	Low	High	Low	High
2	Kkd-602	Do	Do	Do	Medium	Low
3	Kol-1	Neutral	Do	Medium	Medium	Do
4	Kol-178	Slightly acidic	Do	Do	Do	Do
5	Vdk-30	Neutral	Do	High	Do	Medium
6	Near Site-1	Medium acidic	Do	High	Do	Do
7	Near Site-2	Do	Do	Medium	Do	Low
8	Near Site-3	Alkaline	Do	High	High	Medium
9	Near Site-4	Neural	Do	High	Low	High
10	Near Site-5	Neutral.	Do	Medium.	Do	Medium

With the imited data on the soil condition a detailed study could not be undertaken. As is seen from the above, soil is not generally highly acidic. Many valuable climbers like species of Apocynaceae, Caesalpinnaceae , Dioscoreaceae are seen in sacred groves having sandy loam with medium Potash , medium organic carbon and low phosforous. The occurrence of climbers and herbs in large numbers unlike in other regions could be something related to this condition. There is no marked change in the composition of vegetation from place to place within the area. In the middle land there are some SGs having hard laterite and stunted tree species are seen –eg-Syzygium caryophyllattum. But there is profuse growth of climbers.

As stated in the results of soil test, generally soil acidity is medium or low unlike the regions of south. Where ever soil acidity is medium, organic carbon is high. The soil outside the sacred groves is found to be neutral in pH or tend to be alkaline. The species that has maximum representation as per analysis of distribution is *Strichnus nuz-vomica*. The soil requirement of this tree species ,as reoprted, is loamy soil, slightly acidic, medium OC, low potassium, and low phosphorous. This explains the predominance of his species in these sacred groves. *Ficus* species also prefers sandy soil with low acidity. Hence various species such as *F. tsjahela*, *F. arnotiana* and

F. talbotii are met with in addition to common ficus trees. Most of the important species seen in the 28 selected groves such as- climbers like Bauhinia scandens, Morinda umbelata, Coscinium fenestratum, shrubs like Gomphia serrata, Polyalthia korintii, Anodendron paniculatum, and trees like Maduka neerifolia, Diospyros montana and Mesua ferra prefer medium to slight acidity in the soil.

In sacred groves like Thirumangalam, Thechottukavu, Karimala kavu the soil acidity is above medium and Aglaia elaeagnoides, suitable for such area is met with. In palorath Kavu in Koilandy taluk and in Azhatt Illam kavu in Vadakara taluk where the soil acidity is neutral and organic carbon is medium to high, there is thick growth and high diversity of species.

Soil conservation

Rapid litter decomposition and the root mat development with plenty of fine roots on the surface layer of the soil support large above ground biomass. Many micro organisms, **invertebrates**, fungi etc flourish. Root mat prevents the nutrients from leaching out. This is visible in many SGs when visited soon after rainy season. The spreading net work of large trees prevents to a great extent soil being washed away.

Water conservation.

Almost all sacred groves are associated with ponds. The water from the pond is used for temples rituals and poojas and therefore, kept clean. As the ponds are either within the groves or along the boundary of the groves, these will not dry up during summer. The ponds play a key role in maintaining the water table of the area around the groves. It is observed that the number of ponds are rare in all taluks except in kozhikode. Again quite a number are not natural ponds and they man made. But the under ground water table is comparatively high.

Name of Taluk	Total SGs	No. of Ponds
Kozhikode	653	51
Koilandy	373	7
Vadakara	126	Nil
Thamarassery	79	2

Carbon sequestration

Sacred groves cannot be taken as an isolated system. By its presence amidst a mosaic of landscape such as fringe forests, cultivated areas and human settlements sacred groves enhance the landscape heterogeneity and biodiversity. An assessment on this contribution by sacred groves is a matter of study to be undertaken by biodiversity organizations.

Faunal significance

The sacred grooves harbour numerous birds, butter flies and bats apart from primates and small mammals.(Chandran-1993). Number of tortoise live in ponds attached to SGs. In one SG- there are two varieties. On the ground there are termites, ants and earth worms which play an important role in building up soil .Around 100 sp. of mammals,476 sp. of birds, 156 sp. of reptiles,91 sp. of amphibians and 196 sp.of fishes are reported to be available in the sacred groves of Kerala.(KFRI Reserch Report.406) Though the above information indicates the potential giving an overall picture, in these pockets of SGs many of them are not visible on one or two visits as all depends on the season. The animals found are those which nested there in like snakes, frogs, tortoise, lizards etc. and those visit the site for food and temporary shelter like bats. A clear study on this fauna would involve long period of periodical observation by experts, not to speak of the cost. In this report the study team noted the animals seen directly and also gathered information from the custodians or local people and also available literature specific to such cases. Bats, small mammals, civets, monitor lizard monkeys and Peacock are the animals very frequently visiting these SGs. Termite mounts are noticed even though they are generally present inside dead wood and below soil.

Gall formation on leaves.

Galls are abnormal growth on plant tissue caused by insects, mites, mematodes , fungi and the like.This growth is rich in protein and carbohydrates.Elaborate studies are lacking in the real reason and impact of galls. But no serious damage to plants is reported so far.This is reported to be used in making dyes, ink, and tannic acid. “ Folk remedies from earlier times frequently included galls from earlier times thinking this to be supernatural.” (IOWA STATE UNIVERSITY).-However the presence of gall is noticed in some of the sacred groves on plants particularly- *Stychnos* sp. ! say in Azhiyoor korathu kavu –(*picture-13 Plate-IV*)

Role of termites

Termites are insects that live in colonies composed of individuals (i) from more than one generation, (ii) those give co-operative care of the young and (iii) those showing reproductive division of labour. Some species live within wood and others inside soil matrix in nests that are described as diffuse gallery systems. There are still others which while living inside soil build mounds emerging from the soil surface. The occurrence of mounds. Such cases are seen plenty during November-December in many SGs in Kollam taluk.

Termites form a significant element of soil micro-fauna. The food of termites mainly is plant material. Termites can also feed on animal products such as dung, fresh mammalian carcasses. Some termites feed directly on the wood of living trees while there are others which depend on humus in the soil. The former type possess an intestinal fauna of flagellate protozoa which initiate the digestion of cellulose. The other one depends on fungi and bacteria acting on food supply before it is eaten. One sub-family of *Termitidae* collects sound wood and stores it (*Macrotermitinae*) within the nest to be worked on by specific fungi. Another type depends on the humus present in the soil for nourishment and utilizes large amount of excreta for construction of mounds. Studies on termites also reveal that they have no sight and they are deaf. They recognize their nest mate by their special odor. They leave scent trails to food sources outside the nest. The scent comes from a gland present on the under side of the abdomen.

Below ground nests are very common where moisture remains at low levels throughout the year. Here evaporation and desiccation remain low. Cellulose is the desired product for them though they feed on grain, dung etc. Lignin from plant particle is used to reinforce nest material and shelter tubes though it is non-digestible. They eat their dead to gain protein—a case of cannibalism. In dry conditions termites are the main decomposers of litter due to their ability to avoid dehydration and face prolonged desiccation.

The influence of termites on living trees adversely affects timber production. But their activity on fallen and dead wood in sacred groves improve the soil fertility. Termites take active role in cellulose processing and soil bioturbation. In doing so they establish symbioses with both microbes in the guts and many organisms in their mounds. They act on soil and litter by feeding and excavating soil. They break down litter into smaller particles and expose inner surfaces of litter for early action by

bacteria and fungi. Their mounts are seen in some of these SGs where leaf litter is plenty during cold season.

Wild cat- (*Felis silvestris*)

.Wild cat is the ancestor of domestic cat. It feeds on ducks, small rodents, fish, egg etc. They live in rocky areas with tall trees. The presence of wild cat is an indication of high degree of faunal density.

Monitor lizard.

This species is included in the IUCN Red List as threatened species. It is noticed in sacred groves adjacent villages and is diurnal. It could be seen in the mornings and evenings. It, being carnivorous, can eat anything it can overcome. This is considered to have medicinal value and tribals do not spare them. Being a top predator and scavenger this can check the population of rats as wild cat does.

Mongoose (*Herpestes javanicus*)- is considered to be a destroyer of vermin. It feeds on wide variety of vertebrates and occasionally on fruits and vegetables.

Bats

The bats visiting the SGs fall under the category of fruit bats and they form abundant group of mammals. They are seen roosting in many sacred groves. They play important ecological roles as prey and predator, arthropod suppression, seed dispersal, nutrient distribution etc. As studies indicate that the economic benefits from bats in general are, biological pest control, plant pollination, seed dispersal, guano mining, bush meat and medicine, aesthetic value, education and research. In spite of the economic benefits, damage caused on human, livestock and agricultural crops are also reported. They have enemies also such as amphibians, reptiles, owls etc. Most of the bats are predated during roosting or foraging. They form hosts for parasites as we learn about bat fleas, bat flies, bat mite and bugs which live on the skin surface and in fur of bats.

Although pollination by bats is relatively uncommon, in arid and semi-arid habitats agave and cacti are pollinated by bats. Seed dispersal in respect of fleshy fruits done by bats is tremendous. The night foraging fruit bats are more active than birds in foraging fleshy fruits, covering long distances and defecate during flight and thereby contribute seed dispersal.

The guano is having high nutrient potential and it is dispersed over landscape during flight. Bat guano is reported to support diversity of organisms like arthropods, fungi, bacteria and lichens.

With the basic information as described above when we watch their role in sacred groves we feel that many of the observations and their behavior remain unanswered. Generally the bats seen in sacred groves are those having yellow colour at the abdomen which is visible when they hang upside down while roosting. They are commonly seen roosting in trees like, Vateria, Elanji, Jnaval, Elavu Punna and Pana. Evidently they prefer trees bearing fleshy fruits. But we have not come across bats roosting on *Antiaris toxicaria*. It is presumed that they avoid this tree due to the toxic sap this tree contains in their bark.

Another observation is that they are not very common in sacred groves. But there are many SGs where bats are not reported. Though they are seen in one SG in the nearby SGs they are absent. They are seen only in very few SGs attached to temples. Here again they occupy isolated corners where disturbance is least. One reason for their selection of SG may be least disturbance from people, availability of fruit trees not only in the SG but in surrounding areas supporting palms like coconut, and areca nut. Apparently they avoid crops applied with pesticides. Local people complain about the damage they cause to the agricultural crop like palms.

There are instances where the trees are destroyed by their roosting in SGs. *Caryota* urine, tall *Vateria* and *Adenanthera* trees and also coconut and areca nut palms... While some of the custodians raise this complaint against bats, most of the custodians of SGs supporting bats have no such problem. Another observation is that they also roost in trees without any leaves. They are not bothered even where loud speakers are fixed on trees. Here they are often seen hanging on *Vatica chinensis* as can be seen in *picture 14- Plate V*.

Peacock

Peacock visits some of the SGs finding favourable conditions of food. It feeds on plant parts, insects, white ants etc. Also it takes plenty of water. It can devour even snakes. It scratches termite mounds in sacred groves and eats the ants coming out. Peafowl is reported from many of the SGs. But they are mostly on the move. They prefer SGs adjoining paddy fields. Local information is that they suddenly appear in the morning or evenings soon after rain subsides. Sacred groves with light canopy and bushy undergrowth or tall grass are stated to be their favorite. Their way of foraging

make the surroundings healthy. They feed on lizards, rodents, and even small snakes. They avoid flying but do fly to tall trees for roosting.

By virtue of their iridescent bluish green plumage and beautiful large tail they are noticed easily by people. They escape from falling victim to the hunters as long as they are in the vicinity of sacred groves.

CIVET-(Toddy cat)

This elusive nocturnal animal is mostly herbivorous. Besides fruits they feed on small insects. They relish palm flower sap and has earned the name-Toddy Cat. They are very commonly reported seen in SGs. But nowhere we could get any report about the damages they cause to the plants excepting feeding on fruits.

CHAPTER -VIII

SOCIO CULTURAL ASPECTS

Worship/ Deities/Folklore/ Folk Arts

Introduction

It is believed that Arabian Sea once extended up to the foot of Western Ghats and the land of Kerala has emerged out of sea bit by bit over a period of centuries. Therefore the hilly districts like Malappuram, Palakkad, Idukki etc can claim its antiquity much more than the coastal districts of Kerala. Calicut (Kozhikode) is one of the districts with extensive coastal belt on the one side and luxuriant forest area on the other side. It is a historical piece of land with a hoary past. It is also called the Cock Fort. According to the historian, K.V.Krishnan Iyer, the term Kozhikode means Koyil (Palace) Kodu (fortified). Anyhow, from time immemorial, this piece of land attracted travelers and traders, with its charming physical features and prosperity, especially being the ‘city of spices’. Even today, the glory that Calicut had has not faded. The political history of Kozhikode is a story of treacherous and ill-conceived conspiracies hatched by the Western powers. The history of Kozhikode reveals that this land was earlier ruled by the *Cheras* and later by *Samoothiries*.

Population- religion

Kozhikode has been a multi-ethnic and multi-religious town since the early medieval period. The Hindus forms the largest religious group, followed by Muslims and Christians. Hindus form the majority at 57.7% of the population. Muslims form 37.6% of the population. According to historians, the Arabian traders had very good rapport with the Samoothiries of Kozhikode due to the trade transactions of spices and other hill produces. In return, the Samoothiries permitted to preach Islam in the land. Though there had been Christianity in the area, it flourished only with the arrival of the Portuguese after 1500 AD.

The Hindus engage in beliefs spanning all forms of theism as well as atheism. Brahma, Vishnu, Shiva and other Gods and Goddesses of the Hindu pantheon are worshipped. Many places have temples with local deities, more often a

Goddess (Devi). Festivities like *Theyyam*, *Thira* and art forms like *Ottamhullal*, *Kathakali* are performed in the festive occasions. Many temples have associated oracles called *Velichappad*. *Serpent* and ancestral worship are also practiced.

Similarly Avethan is a figure head unique in northern kerala. A senior person in a family is designated as Avethan and others in the family take orders from him for every activity connected with the festival and management from him. (Ex. Palakurumbil Palliyarackal Bhagavathy Kshetram kavu-Id.8. Kozh.

Komaram is also a rare designation to one who is considered to be a representative of Devi deity. By praying and getting blessings he invokes the power of Devi and predict certain changes required. He also suggests remedies for miseries among devotees. (Ex- Poolayankara Gurudeva Vettikkai Kshetrakavu)Id. Kozh.18

The district, with its historical importance, has number of temples many of which are conspicuous with its extensive pieces of protected areas, the Sacred Groves, locally known as 'Kota'. Though the temple yard is inclusive of the temple structures, constructions and the wooded areas, the 'Kota' is considered as the most sacred place. Even for this study purpose, there had been objections from **the custodians** even **for** entering the 'Kota' in certain cases. This is because of the ardent belief in nature worship. The very existence of 'Kavu' is the result of the strong belief of the local folk in 'Devathas' which is believed as the Goddess of the 'Kavu'.

The Sacred Groves which are protected on the basis as 'devatha sanketham', are kept with utmost sacredness. It is quite human to depend on gods or *devathas* when things are out of one's control. The faith on *devathas*/deities increased when favorable things happened even by accident. The result was strict protection of this eco system in the name of worship of *Devathas* or *Dieties*.

Deities and Worship

Kavus are considered as sacred gardens. To protect and conserve the *Kavu*, many rituals and related practices are followed. Worship of *devathas* is the most common ritual followed. Many of these devathas are of local concepts. There is diversity in deities worshipped in the *Kavus* of the district. Each has a presiding deity and most of them have associated deities too. Presiding deity may be a God, Goddess or Serpent. Many *Kavus* are dedicated to snake alone. Snake is also the associated deity in many other *Kavus*. The deities are known by different names in the various *Kavus* of the district. *Ayyappan*, *Sivan*, *Guru*, *Muthappan*, *Hanuman*, *Subramaniam*,

Jathavan, Bhairavan, Vettakorumakan, Kariathan, Kuttichathan, Karumakan, Kirathamoorthy etc are some of the Gods worshipped and *Bhagavathy, Bhadrakali, Devi, Annapoorneswari, Bhuvaneswary, Durga, Kodungallur Amma* etc are the Goddesses. *Nagam, Nagakali, Nagakanyaka, Naga yakshi* etc are the *Serpant deities*. In some SGs, *mere sangalpam or chithrakoodams* are also worshipped.

The village society collectively takes part in the rituals. By conducting the rituals the entire community is believed to be blessed. It represents unity and collective action of the community. Here both *rights* and obligations are strengthened. Blood cult existed in the past. Sacrifice of a large number of common fowl was done in the past but is stopped by law now.

Presently, symbolic hunting is *performed* to satisfy the spiritual need of this ritual.

Except a few, ownership of most of the *Kavus* vests with non Brahmin communities. *Nair* and *theyyar* communities have the majority in ownership of the *Kavus*. A few *Kavus* belong to *Assari* community and scheduled castes. Though the ownership is as mentioned above, *poojas* are mainly *brahmana pooja*. Worship patterns and rituals vary from place to place. In Paikkatukav, the deity *bhadrakali* is worshipped by offering *Bali* with *Coriander powder, Nooru, Honey, Ghee, tender coconut, Aval, Malar, Thechipoovu, Ada, Appam* etc.

Astrology has an important role over rituals and offerings. Astrologer decides the qualification of the person to be chosen as priest in most shrines. He decides the date of festivals in *kavus* where there is no fixed date. He declares the need for an additional rituals during festivals.

Individuals seek the advice of astrologer for finding out the kind of offerings to be given by them in order to escape from wrath of deities which are supposed to be manifested in the form of severe diseases, financial crisis or sterility. The same astrology is now alleged to be turning into a threat for the existence of sacred groves. In order to cut trees from sacred groves for financial benefits or to clear the land for construction purposes, the astrologer's advice to conduct *punaprathishta* is sought now-a-days.

Sacred Groves & Environment

The protection given to Kavus ensures protection and conservation of the eco system of the site. The *Kavus* may be seen as a small sanctuary which facilitate as a dwelling place for many birds, reptiles and rodents. By imposing strict restrictions on constructions inside the *Kavus*, the environmental equilibrium is maintained. *Elengi* tree is an important tree in the SGs of Kozhikode district. This tree has special importance in *Abrhmana pooja*. *Chamatha* firewood is used for the *poojas* in *Brahmana pooja*. Because of the mishaps occurred in many *Kavus*, even naturally fallen trees are not removed or sold, thereby enrichment of the soil quality is ensured.

Folk Arts

During festive occasions in the temples or kota, entertainments like *koothu*, *kathakali*, *ottanthullal*, *kaikottikali* etc are performed. Ritual dances such as *Mudiyettu*, *theyyattu*, *thidambu nritham*, *Thira and Theyyams* are performed as part of the religious festivals.

It is believed that after the creation of Kerala by *Parasuraman*, he created *Kavus* and considered them as *bhoothastan*. Thus kavus are known as *bhoothastan*. In most other districts of Kerala, the rituals and worships are mostly related with snake worship. But in this district, mostly the *kolangals* of *bhoodevathas* are exhibited in art forms. Such *kolangals* are known as '*thira*' in the district. Such dances are known as '*thirayatam*'.

Kolangal

The term *kolam* means figure or shape or make up in the folk language. The custom of *kolam* dance is a form of worship of the *bhoothastan* spirit.

Munnoottan, *Peruvannan*, *Malayan*, *Karimbalar* etc are some of the communities who perform '*thirayattam*'. *Munnoottans* are those who received the designation '*munnoottan*' from *Samoothiries*. In *Poyil kavu*, worshipers belonging to *peruvannan* community perform the '*thira ulsavam*'. For the deity *kariathan* there is a ritual known as *panni(pig) nayatu*. For this the worshippers offer dogs and pigs. *Thiras* of *gulikan*, *kuttichathan*, *nagam*, *nagakali*, *nagayakshi* etc are performed in the *kavus* of the district. *Erokadi* is a type of *thudikotipattu* performed in some *kavus*.

Thirayattam

Thirayattam is a ritual art form performed in the temples of the district. It is performed on a masonry stage called thara and thus the name modified to thirayattam. Another version is that the semi circled wooden crown fixed on the head to perform dance is known as 'thira'

and hence the name '*thirayattam*'. Another meaning of *thira* is *kappam* (tax). In brahmanpattu, there is mention about *thira*- collection of tax. Generally the period of *thirayattam* is from the months of *Dhanu* to *Medam*. *Thirayattam* is usually performed at night. *Thudi*, *Chenda* and *lathalam* are the various instruments used in *thirayattam*

A crown on the head, paintings and writings on the face & chest, a big '*uduthuketu*' etc are some of the costumes and make up patterns. For making colors, rice powder for white, coriander powder for yellow, Chayiliam for red, karimashi for black etc are used. The crowns are of different types, Vattamudi, peelimudi, thongalmudi etc. Dance versions like nadayattam, ganapathiyattam, saraswathi vandanam, mathipu are performed in thirayattam. Mukannithalam, chavittuthalam, chamundithalam, ilakiyattam etc are some of the thalangal in thirayattam. The arrival of '*kotukar*' and '*atakar*' (dancers) on thirayattu day is known as *purappad*. Thottam, *edupu vakkal*, *arangola* and *kurithi* are the rituals before commencing *thirayattam*.

Rudhira kolam

Rudhirakolam is a type of ritual folk dance performed in the temples of Kozhikode district especially in regions like Kadathanadu, iruvanad and places north of Korapuzha. Subject of the dramatic dance is the story of killing darikan. This kolam is performed by the community Deivam padi Kurups. It is presented during the period between Vrichikam to Medam. Costumes for Darikan are as follows:- Uduthuketu in white cloth, on the face, chest, hands and legs, paintings with rice powder, coriander powder and karimashi; there will be a crown, bangles, chains, black or red dress, etc. Musical instruments used are pani, kurumkuzhal and chengila. *Rudhirakolam* is performed in three scenes. In the first scene, the arrival of *Kali* and

the disappearance of *darikan* takes place. In the second scene, *ganapathiyattam* and blessing the community (arulapad). In the final scene, the killing of *darikan* by *Kali* is performed.

Theyyam

Theyyam is the unique ritual related to *Kavus* of north Kerala. *Theyyam* rituals are most attractive and amazing. ‘*Theyyamthullal*’ are dances performed with costumes of gorgeous colours and *mudi* (headgear) or crown of varying size (and shape) worn on head. The ritual

comprises of ancestral worship, hero-worship, demonolatry, virginal cult, cure deities, zoolatry, and blood cult. Ritual hunt is performed in order to please the deity. At present, hunting and slaughtering animals have been prohibited by law. Hence they are performed symbolically. There are folklores explaining the power of each deity. Folklores have evolved into myths which compel the society to worship deities and to perform rituals. Strong taboos prevented the society from exploiting the resources of the sacred groves. Each *kavu* is a subject in the folklore. *Thottam*, the ritual song recited at the beginning of *Theyyam* is a poetic narration of the legend of the deity (ies) in sacred groves. The songs narrate the emergence, life, and power acquired by the deities. Folklore spreads the fame of the deity of *Kavu*. Male and female Gods are the symbols of hero worship. In certain places like Paliyerikavu, the presence of *Brahmanical* deities and associated rituals indicate the ‘Sanskritisation’ process at work. ‘Sanskritisation’ is a term introduced by late Prof. M. N. Srinivas, the sociologist. It is the process by which the lower classes emulate, imitate, and adapt the behavioral patterns of higher classes in an attempt to move up the social ladder. In ‘Sanskritisised’ sacred groves, the deity is worshiped by daily *pooja*, and *theyyam* ritual is performed only on a fixed date. From the oral history collected from elderly persons the remarkable similarity in the history of many *kavus* could be noted.

Pulluvanpattu

One of the oldest religious practices in India is snake worship. Many a narrative alludes to the origin of Kerala being related to serpent. Snake worship was practiced in Kerala since early times. *Pulluvanpattu*, a prominent folk song of Malayalam, reflects this culture (Vaalath 1992). He points out the relation of snake worship with Buddhism. Serpent worship might have reached India from Egypt or West Asia.

Thidambu nritham

Thidambu nritham (a dance with the replica of the deity) is a ritual dance. It is one among the many art traditions. Thidambu nritham, as the name conveys, is an elegant dance carrying the decorated image of the deity. This art form is commonly performed by the nampoothiries or upper caste Hindus.

Kavoottu

This is another form of festival in which trees were offered pooja. Certain group in the community known as Mannans are entitled to carry out this .For example, in Thekkel Bhagavathy Kshetrakavu in Chengottu village, 43 trees were identified. Near each tree they erect pantham-(a long stick wrapped with cloth and dipped in oil). The pantham is lighted and pooja is carried out in the night. This is carried out with utmost care to prevent any possible damage to vegetation. It is a pleasant sight to watch flames in the sacred grove.

CHAPTER IX
SOCIAL DIMENSIONS

A. CUSTODIANS OF SACRED GROVES.

The custodians of sacred groves fall under different categories depending on the social conditions and legal status of land. Mainly three categories are identified namely Private management, Public management and management by Government supported Institutions like Devaswam Board. Even among them there are various sub-types according to the ownership.

I. Private Management

The basic factor here is that the full propriety of the land supporting sacred grove belongs to one family or group of families. There are in all 1027 such SGs coming under private category in this district. The sub-groups are two, i. Kudumbakavu, ii. Kudumba Trust/Committee .

Kudumbakavu.

In this case ,as is generally seen in respect of Hindu families, the sacred grove form part of own property of the family being maintained traditionally from generations to generations with the purpose of maintaining general protection of the family and worshipping deity based on their religious belief. The head of family normally is the top authority in the management. Since these sacred groves are hundreds of years old they hold a link to the family partition deed wherein stipulations are there for the maintenance of sacred grove and allotment of additional area for generating income to maintain them. .

Kudumba Trust / Committee

In certain cases the partition deed stipulates the responsibility of maintaining the sacred grove with a specific family and when the same family expands into more number of families later without losing their right and responsibility to preserve the sacred grove; these families work jointly to manage the affairs of the SG. In such cases they have the option to form a committee or register a trust as the case may be without altering the legal status as private. The trust/ committee periodically elect office bearers like President, Secretary and committee members to manage the

activities relating to the SG. A byelaw is only optional and they sometimes manage with clear understanding among them.

II. Public Management.

In this case the ownership goes to a public body which governs the management according to generally approved legal principles. It can be registered as public committee or function as a public committee with oral understanding. In either of the cases many or all of the members are from the public having faith in Sacred Groves. In this there are two sub-categories namely Public Committee and Public Trust.

i. Public Committee.

Such committees are usually formed when an owner of the SG is financially too poor to manage the affairs of the SG while at the same time the local people consists of devotees having faith in the deity or sacred grove. Another reason is when the SG is on the verge of complete destruction or encroachment by other people inviting resentment from local devotees . All such instances immediately provoke the local people to form committees to maintain and protect the SG. Again instance are there when the land under an SG is purambke under Revenue, Forest or Panchayat like minded people constitute a public committee for security.. Some such committees go in for registration with local Registrar's Office. They maintain registers of accounts for every monetary transaction and present all matters during the meetings. There are 176 SGs listed under such committees.

ii. Public Trust

This is a more solid and strong institution having more legal backing. They adopt a byelaw as stipulated by Registrar of Societies and obtain registration as per rules. They elect president, secretary, treasurer and committee members and follow their activities according to the duties and responsibilities stipulated in the byelaw. The circumstances leading to the constitution of public trust are the same as in the case of Public Committee. But in this district Public Trust are very few say-five only.

III. Malabar Devaswam Board.

There are SGs attached to Temples under the management of Devaswam Board. There are instances where temples are constructed by the custodians which were subsequently taken over along with SG by Devaswam Board for management. The SGs of this category was formed in this manner. Though more attention is given

in the affairs of temple equal importance is given to the rituals in the SG also, thereby providing sufficient security to SG..

A statement of SGs under the above categories is given below. It can be seen that majority of the SGs are under private management.

Name of Taluk	Private	Public Committee	Public Trust	Malabar Devaswam Board	Govt. owned	Total
Kozhikode	614	31	2	5	1	653
Koyilandy	266	103	-	4	-	373
Vadakara	83	30	-	13	-	126
Thamarassery	64	12	3	-	-	79
Total	1027	176	5	22	1	1231

The private category include both 154 Major and 873 Minor sacred groves.

A. ATTITUDE OF CUSTODIANS

1. Communal Harmony

The custodians of sacred groves belong to various communal groups. Also we find that people from different religions associate in this venture. A few such cases are explained below.

Sree Poolayankara Gurudeva Vettikkali Bhagavathy Kshetrakavu. (No. Kkd/18).

This SG has 5 cents in extent and situated in Pantheerankavu Village of Kozhikode taluk. This was originally with Brahmin family but this was transferred to different groups. First it came into the possession of Kuruppan family. They handed this over to Thiyya family. When the Thiyya family carried out partition of properties they entrusted the SG finally with a Harijan family which was associating with them. This shows that no one wanted to destroy the kavu

Uchakkavu Bhagavathy kshetrakavu (Id No. Kkd-467)

.This was originally in possession of a Muslim family. In 1970 a public Committee procured this land and maintaining it.

Kidappil Muthappan Gurical Bhagavahy Kavu. (Id. No. Kkd-211)-Mavoor village, Kozhikode Taluk.

This is a small SG of 3 cents. Here the deity is not only Muthappan but also Gurukkal. The deity is represented by two round idols in a symbolic form on the same platform. It is believed that Gurikkal, a member of Muslim Community was a close associate of Muthappan. Here both of them are worshipped.

Kunnathukavu (ID.No. Kkd-88)-Kadalundy village of Kozhikode Taluk. 1 Acre.

This large kotta was originally with a Brahmin family. They got themselves converted as Muslims and automatically the kavu also became a property of Muslims. Since they had the intention not to destroy or keep it without performing rituals they handed over this one acre kavu to Kunnathur Taraward.

Punathil Bhagavathy temple kavu. (Id.No.Kkd-26)-Pantheeramkavu village.

This is a very small SG of 2 cents. This came in the hands of Muslims from the original Hindu Owners. But they sold it to a Local Committee for a nominal value.

Ezhukudical Templekavu (Id.No.Kly-175) Chengottukavu village-Koilandy Taluk

This has 10 cents. Here People from Muslim Community associate with the custodian. Breaking coconut is part of the festival and a member of the Muslim community has the privilege to break the first coconut.

Thevarkandy kotta- (Id.No.Kly-344),ozhkallur village. Koilandy.10 cents

This land including the SG was bought by a member of Muslim Community. Though he is the real owner of the area, he entrusted the kavu to Local Committee to maintain it .

All the above instances stand to reason that harmony among different communities is natural and stable unless disturbed by intervention of external forces guided by self or political motivation

2. Possesive attitude.

Chembalakkode kavu- (Id. No. Kkd-186)- Kuttikattur village.of Kozhikode taluk.

This has an extent of 2.18 acres, owned by a Nair family. They do not allow outsiders enter the kavu. Publicity, donations, and even cash box for receiving offerings by cash are not allowed. The oil for lighting lamps are prepared within the

family by members. Any one can visit for *darsan* only with the permission of the custodian. For this also there are restrictions.

Patteri Illam kotta- (Id. No. Kkd-193) , Peruvayal village.of Kozhikode Taluk.

Here also there is very strict security and entry is allowed for Nanoothiries only though it has only 4 cents .

Playullaparambath Kuttichathan Bhagavathy Temple Kavu.(Ld. No. Vdk-113-Velam village of Vadakara Taluk.

Here again there is some kind of isolation. The custodians are not in favour of donations. Each family of the devotees every day contribute one hand full of rice and this is the only source of finance to manage the SG and temple. It is stated that there are around 400 families involved.

B. SOCIO-ECONOMIC CONDITION

As already explained, out of the 1231 SGs in Kozhikode District almost 90 % are under private ownership –which usually are called Kudumba Kavus. The socio-economic condition revolves around faith in worship, fear of God, respect for taboos, disciplined maintenance and local appreciation besides environmental considerations affording protection of nature.

.Privately owned SGs.

Majority belong to Nair and Thiyya communities. But there are some managed by other communities like Pulaya. Socio-economy depends mainly on the day to day management , activities and local support. An attempt is made here to take to stock the sources of income and expenditure. The sources are mainly contribution from the owners, supported by contribution from devotees either in the form of offerings, or sponsoring expensive programmes.

When the question of expenses for maintaining the sacred groves among private category, there is considerable variation in activities and expenditure. No uniformity is noticed and every individual SG has its own method in the frequency of programmes without much changes in pooja. A few cases are explained below-

I. Kollarackal Sri Bhagavathy kavu-Olavanna village- Kkd-1

This has an extent of only 3 cents. But is prominent due to the temple. Here morning and evening poja, Thira, Surpabali, Thalapoli, Festival at least once, etc are performed.

Expenditure

There is one priest who is paid Rs. 11000 monthly. Three helpers are there getting Rs. 2000 per month. Monthly expenses for meeting cost of pooja materials is Rs. 10,000. Total cost for various festivals would be Rs. 2.5 lakh yearly. Contributions including donations and sponsorship come around Rs. 5 lakh. This is the condition in an SG well maintained and well attended by devotees.

ii. Kottol Paradeatha temple SG- Id-Kkd-263

This has a wooded Sg spread over 3 acres. Here the priest gets only Rs. 8000 per month. Rest all the same as above. But expenditure per year is Rs. 1.5 for festivals and income is Rs. 4 lakh.

There is another one –Chempilottu KavU, 2 Ac. which is an exclusive type. Here the owners do not allow any one else to manage or contribute in expenses. Devotees can attend pooja and probably give offerings which is only nominal. The topmost member-Karanavar-will conduct pooja. In all they spent about Rs. 4 lakh per year and get nearly Rs. 5 lakh. All these are from among the members of the family.

Again there is one SG –Maratti kavu which is managed by a Harijan Family. Almost all activities are attended by themselves including pooja. They state they have no expenditure except cost of pooja materials which is around Rs. 1500 per month.

In most of the private SGS, pooja is seasonal and it is performed once in a week. But just lighting a lamp every evening is considered a must. Having analysed all the cases attempted it has been felt reasonable to classify them into two types of private SGs in the method of maintenance.

i.	Major category- 15 %	-	154 Nos.
ii.	Minor category- 85 %	-	873 Nos.

MAJOR CATEGORY - 154 Nos.

Under this category there is regular pooja every day and there is a priest with helpers . Ayilyapooja, Sarpamthullal, Annual festival with entertainment programmes are organized. But on expenditure side, lot of care is taken to avoid extravagance and sponsor ship and donations are kept at the minimum.The members of the family make financial contributions which is normally enough. The Expenditure and Income stated below is an average case located to be applied for this category as a whole.

Expenditure & Income

Particulars	Number	Man days Monthly	Monthly expenditure	Annual expenditure	Total annual income
Priest	1		6000		72000
Helpers	2 x(1500)		3000		36000
Man days	3	90		108000	
Pooja material			2000	24000	24000
Festivals including monthly and yearly				2,00,000	2,50,000
TOTAL			11000	3,32,000	3,82,000

Total Position for the 154 SGs

Employment.

No. of man days	$-90 \times 12 \times 154$	= 1,66,320.
Wages		= 166.3 lakhs
Annual –Expenditure	$3,32,000 \times 154$	= 511.28 lakhs .
Annual income-	$3,82,000 \times 154$	= 588.28 “

MINOR CATEGORY- 873 Nos.

Out of the 1027 SGs under Private category, 873 are under this. The custodians manage it as a family property where outsiders are given limited access. They are prepared to run it on their own irrespective of any support from any outside source.Faith and observance of taboos are the main concern.

As regards pooja , the frequency varies. Baring a very few cases where there is no pooja, in all the other cases lighting a lamp in the evening is always there.This is done by a delegated member of the family. The convensional pooja is performed once in every week, or once in a month-Ayilyam pooja. Some may organize more activities

like pooja and poor feeding during Sabarimala Season etc. But every thing is limited to available and reasonable resources which are with in the control of the custodians. A typical case which can be taken as an average as regards the expenditure and income is given as below. Since priests and their helpers are engaged only occasionally, a bare minimum is taken for mandays created for applying to all SGs.

Particulars	Number	Per month	Monthly expenditure	Annual expenditure	Total annual income.
Priest-seasonal	1		1000		
Helpers-do-	2		1000		
Man days	3	3	2000	24000	24000
Pooja material			1000	12000	12000
Festival				1,00,000	1.25000.
Total			3000	1,36,000	1,61,000

Total Position for the 873SGs

Employment.

No. of man days	$3 \times 12 \times 873$	= 31428.
Wages		=209.52 lakhs
Annual –Expenditure	$1,36,000 \times 873$	= 1187.28 lakhs .
Annual income-	$1,61,000 \times 873$	= 1405.53 “

SGs MANAGED BY PUBLIC COMMITTEES.

Here the main intention of the Public Committee is to conserve the sacred grove and prevent its disappearance in due course. They are guided by faith and respect for taboos. At the same time where ever there is scope for running it on a large scale with more input in finance ,in such cases high income is coming up which can later be used for the conservation of SGs.The case of Thekkayil bhagavathy Temple kavu (Id. KOIL-179) in Chengottukavu village of Koilandy Taluk is the one. Total extent of the kavu is 1.5 acres, and it is being well maintained by the committee and is devotee predominant . There are three priests and three helpers. The total expenditure is around Rs.4 .0lakh. and total income is including donations Rs. 7 .0 lakh per year.Another one almost similar is Malol kuttichathan kavu in Onchiyam village of Vadakara Taluk. Though the extent is only 7cents, devotee support is high and they spend more than four lakhs in an year.

Excluding cases similar to the above which are very few, an average case is found to be that of Kuthirakkada Sree Ayyappa kavu (Id. Kol-267) in Arikkulam village of Koilandy taluk. Pooja is performed seasonally, say once in week. Hence the man days per month can be taken as 12

PUBLIC COMMITTEE 176 Nos.

Particulars	Number	Monthly man days	Monthly expenditure	Annual expenditure	Total annual income.
Priest	1		6000		
Helpers	2		4000		
Man days/pm		12		1,20,000	1,20,000
Pooja material			5000	60,000	60000
Festivals				1,50,000	2,00,000.
Total			15000	3,30,000	3,80,000

Total Position for the 176 SGs

Employment.

No. of man days	$-12 \times 12 \times 176$	= 25344.
Annual –Expenditure	$3,30,000 \times 176$	= 580.8 lakhs .
Annual income	$3,80,000 \times 176$	= 668.8 “

PUBLIC TRUST & MALBAR DEVASWAM

In all there are 5 SGs under Public Trust and 22, under Malabar Devaswam. The SGs are attached to temples. Rituals, expenditure and income are more or less the same. Hence they are taken together and the economic aspect is worked out based on an average case. Again the financial aspect regarding kavu cannot be exactly identified separately since rituals, pooja, payment to employees etc are included as part of the temple management. It is felt ideal to set apart 20% of the data as contribution related to sacred grove. The following figures are worked out accordingly.

PUBLIC TRUST & DEVASWAM

Particulars	Number	Monthly man days	Monthly expenditure	Annual expenditure	Total annual income.
Priest	1		3000	36000	36000
Helper	1		2000	24000	24000
Man days/pm		15			
Pooja material			3000	36,000	36000
Festivals				1,00,000	1,50,000.
Total			8000	1.96,000	2.46,000

Total Position for the 27 SGs

Employment.

No. of man days	$15 \times 12 \times 27$	=	4860.
Wages		=	16.20 lakhs
Annual –Expenditure	$1,96,000 \times 27$	=	52.92 lakhs .
Annual income-	$2,46,000 \times 27$	=	66.42 “

ABSTRACT

Category	Number	Mandays	Wages Rs. Lakhs	Annual Expendiure Rs. Lakhs	Annual Income Rs. Lakhs
Private- Major	154	166320	166.3	511.28	588.28

CHAPTER X
MYTHS – LEGENDS & THREATS

A myth is a story, based on traditional knowledge passed on to generations, which people are inclined to believe depending on their attitude to the subject matter. Although some myths can be accounts of factual events, they have become transformed by symbolic meanings. Myths or stories about sacred groves would be fascinating or even frightening. A legend is a semi true story, which has been passed on from person to person and has important meaning or symbolism for the culture in which it originates. A legend usually includes an element of truth, or is based on historical facts, but with mythical qualities. There are only a very few instances to point out and myths & legends which are more or less same in this area as could be collected.

Myths

1. Sree Thurayil Bhagavathy Kshetrakavu. Id. No. Kkd-442

Myth-Story of arrow root pudding.- This is one of the large SGs having 10 acres in extent situated in Kuruvatur village of Kozhikode taluk. Local belief is that this SG is part of (*Maruthua Mala*) which was broken and fallen down on the way, while Sri Hanuman was flying with the hill. This SG is considered to be 2500 years old. The deities in the kavu, namely Saraswathy, Lakshmy and Bhagavathy are “*Swayambhoo*”. In this Kavu, while the earth was dug, blood oozed out from the rhizome of Koova (*Arrowroot-Maranta arundinacea*). Considering the power of deity, there after people prepare koova payasam (arrowroot pudding) and distribute to devotees as *prasadam*-gracious gift.

2. Sree Kaluvettukuzhickal Bhagavathy Kshetrakavu–(No.Kkd-500)

Myth-Faith in curing ills- This is a small SG of 10 cents in Kacherry village of Kozhikode Corporation limits. It is considered that the deity is so powerful that those who worship for relief from diseases do get cured. Another strong belief is that in criminal cases if one wants to get proof against the culprit it is solved by the deity.

Legend

3.Cherukunnu Nagakali KshetraKavu(No.Vdk/-59)

Legend on Parasurama-This is a large SG extending over 2.6 acres situated in Palayat village of Vadamakara Taluk.It is believed that the deity Naga was one among the *108 Nagalayams* consecrated by *PARASURAMA*.This is on the south-western corner (*Kanni moola*) of Kadathanad, a kingdom with Kuttidiadi river as its southern border .

Threats

There are various factors that pose a threat to the survival of some of the SGs. They fall under the following categories.

1. Intention to reduce the extent for self motive

- i. Most of the sacred groves are owned by families and 42 of them are more than one acre in extent. In order to get income for maintenance there is a tendency to clear a portion and construct temples for regular worship and attract more devotees. There are instances where total area of the SG is one acre or above but the actual area under vegetation may be around 5 to 10 cents . The rest of the area is under temple and allied constructions.
- ii. There are other instances when the member of a group of families owning the SG show desire to part with their share or clear their share for financial gain.In the process , practice of shifting deity to major temples by conducting necessary pooja by priests did happen occasionally.

2. Legal disputes on ownership.

Mukkorackal sree Bhagavathy Kshetrakavu-(Id.No.Kkd-40)-Perumanna village

This has 70 cents in extent.This was a private SG owned by one Unnimadhavan Nair. It used to cost him around Rs. One lakh in an year to manage it. Since his financial condition was too poor to meet such expenses the pooja in the SG was discontinued for some years. By this time some youngsters of fishermen nearby formed a committee and took over the Kavau and started Pooja without allowing the involvement of the owner.Brahmins are conducting pooja. A case is pending with the court between the owner and committee.

Jathavankotta, (Id.No.Kkd-82)-Kadalundy village

This is a sacred grove having large extent of 1.4 acres. The Perumannan family bifurcated into two and dispute is going on between the two, in the court claiming the right on SG.

Cheralapuram Karumakan Paradevatha temple kavu.(Id. No. Kkd-201)

This was destroyed during the invasion of Tippu Sultan. Now only 5 cents is remaining and a Local Committee is managing it. Certain members of muslim community are claiming this also and a case is pending with court.

3. Dumping Solid Waste.

There are some SGs which are very close to congested residential and commercial places. Dumping solid waste into SGs is not uncommon particularly when there is no boundary wall. In such cases fire damage, damage to regeneration and even development of feeling of aversion among devotees are the ill effects.

4. Damage by invasive species.

Though most of the Sacred Groves are protected with compound wall and fence, the invasion of exotic weeds constitute a threat to the conservation of Kavus. Exotics such as *Mikania micrantha*, *Eupatorium odoratum*, *Hyptis suaveolens* and *Lantana camara* are the main invasive climbers. *Hugonia mystax* and *Anamirtha* climbers also get their turn. Local climbers also flourish as invasive species and suppress the growth of other tree saplings and even tall trees. Even Invasive species come up when native species are not able to dominate indicating poor ecosystem and degradation.

The woody vines need support for climbing. Naturally they have stems and are flexible. This enable them to grow long and blanket the canopy preventing growth of desirable species. These climbers tend to remain a constant fraction of the total biomass. Most of them are deep rooted plants and have wide vessels that can carry large volume of water up the stem. Small twigs and even small stems are girdled by tendrils or twining stems. Thus they are very much adopted to do damage to other vegetation without any check taking the advantages they have as described above. This phenomenon is evident in many sacred groves. This calls for scientific study to evolve solutions for preventing diminution of the typical vegetation in sacred groves.

CHAPTER XI

RECOMMENDATIONS

1. Separate project for Central Assistance to Sacred Groves.

Financial grant for maintenance of sacred groves received from Government of India is being distributed to the custodians of sacred groves. The present allotment is naturally very low when compared to the actual number of SGs in Kerala. According to the recorded information with Government (refer. website on sacred groves) the total number is 1500. By now with the results coming out of IFK's study in five districts it is the total number exceeds 6000. It is likely the total in the whole state would be around 10,000 and at least 30 % of them deserve financial and technical assistance from government agency. More over forest department had no authentic data on the total extent of vegetation under SGs in the state except those recorded in four districts by IFK.. It is high time that KFD has to come out with detailed proposals for central grant to the custodians who have been protecting these natural patches rendering valuable and intangible contribution to bio-diversity.

2. Awareness Campaign.

Social Forestry wing or Bio-diversity wing of KFD should consider planning awareness programmes in conservation of sacred groves for the benefit of the public & Custodians of sacred groves particularly regarding hygiene of the grove and premises. Present status and importance of sacred groves should be one in the agenda for extension activities targeted on students.

3. Production of quality seedlings of plants.

Social forestry wing may also consider producing quality seedlings of species which are essential trees and other plants as would be emerged from this report. This has to be done after convincing and ascertaining the willingness of the custodians. A few seedlings considered to be typical for sacred groves are noted below for information of social forestry wing of KFD.

Trees- *Vateria indica*, *Aglaia elaeagnoida*, *Holygarna arnottiana*, *Ficus* species, *Aphanamixis polystachya* (Chemmaram), *Vatica chinensis*, *Cynometra travancorica*, and *Dipterocarpus indicus*. These are producing plenty of fruits most of which are liked by fauna, there by promoting biodiversity status. *Dipterocarpus indicus* (kalpine) is a vulnerable species.

Shrubs-Clerodendrum serratum (Cheruthekku), Anidesma diandrum, Allophyllus serratus, Flacourtia indica, Glycosmis pentaphylla etc. These plants have medicinal properties.

Climbers like Alangium salvifolium, Coscinium fenesatum, and herbs like Scoparia dulcis, Crotalaria retusa, Geophila repens having medicinal value also can be promoted in sacred groves.

More details if required can be seen in pages 21-23 under the chapter-IV Composition of Vegetation.

4. Dealing with invasive species.

This is posing a major threat to the existence of sacred groves. Removal and preventing further growth of invasive species is very essential. But the methods to bring about this task without affecting the general structure and ritual concepts have to be designed by a team of forest officials and scientists conversant with this issue which may be ideal.

5. Ensure fair distribution of grant

When grants are distributed to SGs, it has to be ensured that the process is made as fair as possible by verification by a superior. Details if any required can be gathered from IFK in districts where field study has been completed. Poorly maintained SGs if any may be considered only if improvement is ensured. An effective followup on utilisation after distributing grant is essential.

6. Publicity for data collected.

In order to bring the Id numbers of the sacred groves to the notice of all custodians concerned, department may take action for publicity in the press and social media and ARANYAM Magazine.

7. Research studies.

The following studies by a research wing may be considered.

- i. Natural regeneration of various plants in SGs.
- ii. Role of fauna like termites, bats, and many frequenting birds.
- iii. Identifying keystone species.
- iv. Detailed study on soils in Sacred Groves.
- v. Methods to quantify role of SGs in Carbon Sequestration.

8. *Sharing Data.*

The knowledge gained in carrying out studies on sacred groves may have to be shared with other related organizations within and outside the forest department including Biodiversity Board, Department of Science and technology and other stake holders since such information is required for the benefit of the people as a whole.

9. *Recognition on contribution for Carbon Sequestration.*

Above all it is necessary to recognize the service of the custodians in the appropriate manner and give them enough encouragement for the valuable amount of carbon sequestration being contributed by them.

10. *Intervention by Government.*

The sacred groves are being well protected and conserved in general by the custodians without any legal enforcement. Therefore any intervention in the affairs of these sites by Forest Department or Government need to be planned and designed with caution not to disturb the freedom of custodians as it is a sensitive issue.

Norms Suggested for Distribution of Grant under International Bio-diversity Campaign to Sacred Groves by Social Forestry Wing.

1. Necessity

Sacred Groves are now fragmented habitats housing gene pools and have become the last refuge for many threatened, endangered and endemic plant and animal species. Outside the forest limits they constitute isolated vegetative patches in a mosaic form and are protected by the custodians which contribute in Conservation of Bio-diversity and establishment of healthy bondage among local people through faith in God. But they are not free from threats that can cause degradation or disappearance, particularly when there exist rising land value and greed for land for non-forest purpose. Hence it is appropriate that all possible assistance for the upkeep of these pristine vegetation is extended by Government for proper maintenance.

2. Objective

To ensure fair distribution of financial assistance to the deserving applicants for maintenance activities for protection of the SGs.

3. Identification of requirement

Activities

- Construction of Compound Wall,
- Cleaning and maintenance of existing pond,
- Eliminating invasive species scientifically.
- Supplementing regeneration of tree species----site specific.
- Monitoring growth and regeneration of important plants and movements of fauna in selected SGs.
- In general observe phenology of plant and animal life, by engaging trained students in selected SGs.

This is essential for creating awareness among the youth on conservation of Bio-diversity.

4. Eligibility

- SG should have old trees of typical species under reasonable upkeep.
- Should have local acceptance in the neighbourhood.
- Low annual income.
- SGs associated with prominent temples and under Public Trust, Devaswam Board etc, to be **excluded**.
- Eliminate SGs having ownership dispute.
- Proper performance in utilisation of previous grant if any.
- Contribution in carbon sequestration.
- **Grading-** Based on the above considerations,the SGs in each district may be categorised into three or four categories before fixing the quantum of grant.

5. Allotment of Funds.

Total amount received may be apportioned among various districts according to the number of SGs. As regards the districts where IFK has taken up the inventory, the number can be taken in descending order as below.

- Alappuzha
- Kozhikode,
- Kollam
- Thrissur and
- Thiruvananthapuram.

6. Financial Support

i. Financial assistance

This depends on the amount available and the cost of activities proposed. This payment has to be followed up by inspection later.

ii. Grant

A grant in the form of reward for the best managed sacred grove in a Taluk or District can be considered if funds are available. Irrespective of the quantum of amount, awarding such a grant would go a long way in creating awareness and enhancing bio-diversity conservation.

7. Selection of SGs.

In selecting SGs from among the applicants, preference can be given to community owned SGs and SGs existing on areas of high land value like those in cities, towns and road sides.

In making selection , the applications may be examined by a committee at district level consisting of officials from Forest and Local Self Government.

In case the committee need further information about the applicants the members of IFK team may be able to provide the required details based on their visits.
